TAFT SPENT BUSY DAY IN RICHMOND

Addressed Educational Conference and Spoke on Panama Canal Work.

BEGINS HIS MESSAGE TODAY

Back in Washington After Interesting Trip to the Isthmus.—Pays Tribute to South.—Features Yesterday.

Washington, Nov. 23.—President Taft returned to Washington at 8:30 o'clock after naving stopped a day at Richmond, Va., on his way home from the Isthmus of Panama.

The President announced soon after his arrival that he would make no engagements during the next five days. In that time he hopes to have his message to Congress completed.

In his regular message the President will deal with his visit to Panama, making recommendations on a number of subjects which he desires considered and discussed with a view to early legislation.

Coincident with the President's return it was learned that there is not the slightest chance for an extra session of Congress following the coming short session. The President, it is said, sees no necessity for calling Congress to sit after March 4th.

President Taft had an interesting day in Richmond, the most important features of which were an informal address on the Panama Canal at the luncheon given in his honor and an address before the Virginia Educational Conference.

The President in his Panama Canal speech described the satisfactory conditions he found on the Isthmus and aroused intense enthusiasm by his prediction that the canal would be thrown open to the world well in advance of the official date of opening, January 1st, 1915. He declared that if necessity demanded, he believed American battleships could be sent through the waterway by January 1, 1913.

In his address to the Virginia Educational Conference at Richmond, the President said in part:

"Richmond is a city that reflects in every way the wonderful material growth of the South, and at the same time awakens in the mind of the visitor at every street corner and in every public square an intense interest by its historical associations.

"At every turn there comes the local association with Washington, Jefferson, Patrick Henry, Marshall and Madison and other great participants in the natal struggle of the republic, as well as of Jefferson Davis. Robert E. Lee, Stonewall Jackson and the other great leaders of the Southern Confederacy.

"Closely following this thought comes the feeling of gratitude to God that we are now a united nation with the bitter prejudicies of the past dispelled, and able, all of us to accord the proper need of praise to the American heroes of the past whether their deeds were performed and their services rendered in those early days when all Americans were joined in a single cause, or whetner they loomed large as leaders on either side in those four years when brothers were engaged against brothers in an internecine strife.

"I am always glad to meet men and women who have made their profession that of teaching. In the first place, the fact that they have adopted as their life's work the profession of teaching is the highest proof of the fact that they do not exalt wealth and comfort above spiritual and mental progress. They must be content and they must have made up their minds to be content with the life of comparative privation and an absence of luxurious comfort. They have reconciled themselves to 'feasts of reason and a flow of soul,' or they would not be teachers. They must have determined to find their sole reward in watching the minds of the youth develop in intelligence and their souls grow in normal strength and character under the influence of their teachings.

"In the menace to the community which many have seen in the accumulation of great fortunes in the hands of a few men, we must be just and pluck from the beetled danger the flower of generosity and responsibility to the public and the recognition of the trust imposed by such great fortunes which the last decade has made manifest. The millions that have been given by private donors to the cause of education and especially to education in the South, is full of encouragement. The donation by Mr. Carnegie of a fund of twelve or fourteen millions with which to pension emeritus professors in our colleges is doing untold good. And I sincerely hope that by the success of ... foundation other pension systems, either of State or private donation, may be encouraged and carried into execution in order to make comfortable the old age of those who have given the best years of their life to teaching, and find their powers waning and their earning capacity gone with nothing to maintain them in their old age."

Kansas City, Mo., Nov. 23.—Monte Attell, of Calfonia, won a ten round decision over Jimmie Walsh, of Boston, here tonight.

MADERO CLAIMS THE PRESIDENCY

Proclaims Himself at Head of Provisional Government of Mexico.

NO OVERT ACTS ARE ADVISED

American Interests.—Must be Protected.—Rebels Capture Town.—Developments on Borderland.—Representatives Arrive.

Ciudad Porfierio Diaz, Mexico, Nov. 23.—Francisco E. Madero has proclaimed himself "president of the provisional government of Mexico" and admonishes his followers not to commit overt acts against Americans nor to damage property of foreigners. Madero's proclamation is being generally circulated today throughout northern Mexico.

Particular attention is directed to the fact that Americans own a considerable part of the stock of the National Railways of Mexico and all friends of the revolutionry cause are warned that damage to this property might result in the United States government taking steps that would embarrass the provisional government.

The proclamation pictures bright hopes for the success of the revolutionary cause and strongly advises against doing anything that might give grounds for foreign intervention.

Rebels Capture City.

Eagle Pass, Texas, Nov. 23.—Employes of the Federal telegraph lines in Ciudad Porfiria Diaz say Torreon has surrendered to the rebels and that the Maderoists now invest the city. All arms and ammunition at that point has been confiscated, but the owners were told to call at rebel headquarters at Lerdo and they would be paid for the guns. An American conductor reaching Eagle Pass today from Torreon says he counted 21 bodies of Mexican soldier police and rurales in Gomez Palacio on Monday. The revolutionists carried away their dead and wounded.

A high Mexican official of Ciudad Porfirio Diaz says 52 Mexican soldiers were killed at Gomez Palacio.

A report declared to be unfounded was in circulation here tonight that Francisco I. Madero has been capturured this afternoon by Federal troops. Consul Luther Ellsworth places no credence in it saying he would have received notice of it had he been taken General Fructuiso Garcia, commanding the Mexican troops in Ciudad Porfirio Diaz denies positively that President Diaz has been killed, as was reported in a private wire to Denver. He says Diaz has the situation well in hand.

Mexicans on the March.

Douglas, Ariz., Nov. 23.—A detachment of 200 Mexican soldiers reached Auga Preita today and went into camp outside the city. The whole borderland is guarded. The United States authorities also increased the guard on this side of the line.

A large order for rifles and high power ammunition was placed with the retail stores here today by Mexican authorities and promptly filled.

Agent of Revolutionary Party.

Washington, Nov. 23.—Gustava A. Madero, brother of the leader of the revolution in Mexico, arrived in Washington today. He comes as the confidential agent for the revolutionary party, but so far has not called upon the State Department.

U. S. Troops Ready.

Tucson, Ariz., Nov. 23.—Brigadier General Thomas, commanding the department of Colorado, has received orders from Washington to hold the Arizona and New Mexico troops under his command in readiness to be marched to the border to preserve neutrality, according to word received here today from Fort Whipple barracks.

Leaders of the Revolution.

San Antonio, Texas, Nov. 23.—Francisco I. Madero, who is leading the revolution in Mexico, completed his plans in relation to the present outbreak since his arrival in this city on October 7th. He left here the night of November 18th. and crossed the Rio Grande to his own home in Mexico Sunday morning, November 20th, where he took command of 600 men mounted and armed.

Immediately upon his arrival in San Antonio last month he was surrounded by revolutionary leaders, although he disclaimed warlike intentions until he left the city. He came from Mexico disguised as a peon having forfeited bonds for his appearance on a charge of sedition growing out of a speech delivered at San Louis Potosi, May 29th, prior to the election in which he was a candidate for the presidency against Diaz. Madero was met here by Juan Sanchez Azcona, former member of the Mexican Congress, who is also a brother-in-law of Juan D. Casasus, former ambassador to the United States, and by Enrique Bordez Mangel, an orator for the anti-Diaz party in Mexico.

Modero was a good advertiser claiming to be opening his campaign for the presidency six years hence. He has close friends here and through them he was enabled to purchase large quantities of arms and ammuni-

(Continued on Page Eight.)

Will Sing In Wilmington.

Miss Flora Wilson is the daughter of Hon. James Wilson, the veteran secretary of the Department of Agriculture in Washington. She comes to Wilmington to sing under the auspices of the North Carolina Sorosis on Saturday evening of this week, being now on a tour of several Southern cities. Miss Wilson prepared for the grand opera stage under Jean de Reszke in Paris and has been heard in New York and Washington. Miss Wilson recently accompanied her father and sang for a series of political debates in the West during the campaign and the rare combination of politics and grand opera was a novelty even the brusque Westerners could not resist.

GROWTH OF GREATER NEW YORK

Population of Big City Larger Than Remainder of the State.—Striking Feature of the Census Figures.

Washington, Nov. 23.—New York City for the first time has become greater in point of population than all the remainder of the State of New York, outside of the greater city limits. Statistics giving the population of the State as enumerated in the Thirteenth Census made public today, show that the people of the country's greatest city form more than one half of the inhabitants of the most populous State in the Union.

While this is the most striking feature of the New York census figures, almost as remarkable is the rate of growth of the Empire State. Since 1870 it has doubled in population and the rate of increase during the past ten years, 25.4 per cent., is the greatest since the decade between 1840 and 1850, when the percentage of increase was 27.5. This increase is largely attributed to the growth of the cities of the State, and is believed by the census officials to be due to the developments of the manufacturing interests and foreign immigration.

With this increase in population will come a larger representation in the lower branch of Congress, where New York now has 37 members. The exact increase of representatives will be ten at the present rate of apportionment is retained by Congress.

Of the 9,113,279 people in New York State, as shown by today's statistics, 4,766,883 are in New York City and 4,346,396 in the State outside the city, making the city 420,487 people the greater in poulation. In 1900 New York city contained 394,490 inhabitants less than the State outside the city, the population of the city being 3,437,202, compared with 3,831,692 in the remainder of the State.

Of the 1,844,385 people by which the State increases during the past ten years, 1,329,681 were contributed by the city, while only 514,704 persons was the increase in the State outside Greater New York. Of the whole State's growth about 18.4 per cent., was contributed by the City of New York, while the State without the city contributed only about 7 per cent., making the total increase over the 1900 figures 25.4 per cent.

The drift of population from the agricultural districts to the cities in the older States of the Union was clearly indicated in the census returns of the States of New York and Ohio, made public today by the census bureau.

In New York 15 of the 61 counties showed a decrease in population while others made only meager increases. Only the counties containing the larger cities made any considerable gain in population.

The movement was more marked in Ohio than in New York for in the Buckeye State 39 of the 88 counties showed decreases, while in 21 other counties the increase was less than 2,000 inhabitants.

The population of the State of Ohio is 4,767,121 according to statistics of the Thirteen Census made public today by Director Durand.

This is an increase of 609,576 or 14.7 per cent., over 4,157,545 in 1900. The increase from 1890 to 1900 was 485,229 or 13.2 per cent.

OUSTED FROM POSTAL SERVICE

Irregularities Causes Shake-Up in Atlanta Postoffice.—Three Lose Positions.—Department Has Lost Thousands.

Washington, Nov. 23.—Postmaster General Hitchcock today ordered the removal from the postoffice service of Edward E. Blodgett, superintendent of stations, and of James F. Norton and S. S. Giles, clerks, all of the Atlanta postoffice, as the result of gross irregularities in the weighing of newspaper mail.

The orders followed an investigation in Atlanta into the irregularities which the Postoffice Department declares covers a series of years and resulted in the loss of many thousands of dollars to the department.

The department announced in connection with this order that a general investigation of methods of weighing second class mail throughout the country is now being conducted by inspectors with the idea of detecting and bringing to an end such irregularities as those disclosed at Atlanta.

Because of inefficiency in the discharge of his duties the superintendent of the railway mail service at Atlanta, L. M. Terrell, who failed to take the precautionary measures required by the postal regulations to prevent certain of the irregularities, was transferred by the Postmaster General's order from his position of responsibility to a minor place in the service. Superintendent G. W. Pepper, of the railway mail division, having headquarters at Cleveland has been assigned to Atlanta to supercede Superintendent Terrell. Clyde M. Reed, superintendent of the Division of Railway Adjustments in the Postoffice Department, was sent to Cleveland to take the place of Superintendent Pepper. Mr. Reed's position in the department has been filled by the promotion of C. H. McBride, formerly assistant superintendent of the Division of Railway Adjustments.

The evidence obtained in the investigation at Atlanta has been submitted by the Postmaster General to the Department of Justice and that department will determine the question of prosecution.

Mobile, Ala., Nov. 23.—Two cars were in a rear end collision coming from the aviation meet. Several were injured. Both cars were almost demolished.

Tampa, Fla., Nov. 23.—Cigar strike leaders Dela Campa Bartium and Russell were convicted of conspiracy to prevent workers returning to factories tonight. Defense moved for new trial. Motion will be argued next Monday.

CRIPPEN HANGED IN LONDON PRISON

Pitiable Spectacle as Condemned Man Was Led To His Death.

HAS MADE NO CONFESSION

Conflicting Reports However in London Journals.—An Attempt at Suicide is Rumored.—His Bravado Deserted Him.

London, Nov. 23.—Dr. H. H. Crippen was today hanged in Pentonville prison for the murder of his actress wife, Belle Elmore. The execution occurred within a few minutes of the stroke of 9 which was the time officially designated.

The condemned man presented a pitiable appearance as he was literally led throughout the short corridor from his cell to the scaffold. His mental anguish had been too great to be covered up by outward bravado and it was a broken man whom the warders were obliged to assist up to the steps to the drop upon which one being reached the shrinking figure all but collapsed. The first report that Crippen had met his fate calmly was contradicted by persons who were present in the prison during the man's last hours. The doomed man passed a restless night and appeared haggard and worn when awakened from hisfitful slumber. He seemed to lose all fortitude as the end approached. A breakfast was brought to him but he left it untouched. His face was colorless as he was escorted bareheaded to the gallows. The grewsome work was soon done. The black cap was quickly drawn over the face; the noose adjusted and the bolt drawn.

Cripen who weighed 140 pounds was given a rope of 7 feet. Death was instantaneous.

Following the execution the inquest required by law was held, the jury returning a verdict to the effect that the sentence of the law had been duly caried out. The proceedings were held in the prison.

Dr. Wilson, an official witness of the hanging, testified that death was caused by a fracture of the vertebrae.

There was no resistance or struggle on the part of the condemned man and the whole proceedings from the entrance of the cell by the executioner until Crippen was dead occupied only sixty seconds. This morning, following the execution, the prison issued an official statement declaring that no confession had been made. Miss Leneve denies that Crippen confessed. His attorney says that so far as he knows his client maintained his innocence to the end. What was said to the priest proceding absolutely cannot, ofcourse, be known.

If Crippen confessed, as is asserted by a newly established evening paper, he made poor work of it, for the paper gives no authority for its assertions, which are credited to an annonymous friend of the physician, who is himself quoted but briefly.

According to the Daily Express Crippen on Tuesday night was restless in bed. The warders, who became suspicious made a search and found that he had broken his spectacles with the intention of opening a vein and committing suicide.

No Trace of Ethel Leneve.

Southampton, Eng., Nov. 23.—So far as can be learned Ethel Clara Leneve did not sail on the steamer Majestic for New York today, although she had booked a second class passage under the name of Miss Allen. It is thought that she may have changed her plans after they had been discovered, though it is possible that she will join the vessel at Cherbourg or Queenstown.

Frineds of Miss Leneve say that she proposes to begin life anew under a

(Continued on Page Eight.)

OUTLINES.

As a result of irregularities in the weighing of papers in the Atlanta postoffice two clerks and the superintendent of statistics were removed by order of the Postmaster General——The population of New York City, according to census figures is larger than that of the remainder of the State——The unveiling of the Oglethorpe statue to the founder of Georgia, was a celebration of much interest at Savanah yesterday——President Taft yesterday addressed the Virginia Educational Association at Richmond. He returned to Washington last night——Dr. Hawley H. Crippen was hanged in London yesterday for the murder of his wife, Belle Elmore. The American dentist went to his doom without a murmur——J. Armstrong Drexel made a new altitude record in al aeroplane yesterday.

New York markets: Money easy 2 1-4 to 3 3-4, ruling rate, closing bid and offered at 2 1-2; spot cotton closed quiet 10 points higher, middling uplands 14.95, middling gulf 15.20; flour was steady with a better inquiry; wheat spot firm, No. 2 red, 98 3-8 elevator and 97 7-8 f. o. b. afloat; corn firm, new No. 2, 52 1-4 f. o. b. afloat to arrive; oats firm, steady white, 37 1-2; turpentine steady.

DREXEL CAPTURES ALTITUDE RECORD

Philadelphia Aviator Soars to Height of Almost Ten Thousand Feet.

REMARKABLE CLIMB IN SKIES

Went to Unknown Height—9,970 Feet Accepted as New World's Record—Landed 20 Miles From the Field.

Philadelphia, Nov. 23.—J. Armstrong Drexel broke all aeroplane altitude records here today when he climbed above this city until his Blerriot monoplane was unable to make further progress in the rarefied atmosphere. The ink in the needle of his barograph ran out at 9,970 feet, which was accepted as a new world's record tonight by Clifford B. Harmon, chairman of the National Council Associated Aero Clubs of America, and King Duffy, secretary of that body.

The instrument is the same one which Johnstone carried when he made the former record of 9,714 feet at Belmont Park on October 31st. It was brought to this city today under seal by Mr. Duffy in order that the record made would be official.

Mr. Drexel left the aviation field at Point Breeze in the extreme southern part of this city at 3:23. He landed at Oreland, about 20 miles north of the spot where he had started at 4:46 P. M.

In his climb he had traveled at least 30 miles to the northward for when he started to descend, after trying for 15 minutes to force the machine higher, he glided down for a distance which he estimated tonight at about six miles. So swiftly did the monoplane descend that the aviator was nauseated. However, he reached an open field and brought his machine to the ground without injury. He at once notified the officials at the aviation field of his landing.

Clifford Harmon and Grahame-White at once left for Oreland in an automobile and brought the aviator and the barograph still under seal to this city.

Mr. Drexel announced tonight that he is going to fly the machine back to the aviation field tomorrow morning. He was greatly disappointed when he found that the barograph had failed to record an even 10,000 feet. The air was so light it was impossible to make the machine ascend another foot," he said. "The engine would not carry it any further and I was up at the extreme altitude for more than 15 minutes jumping the machine in an effort to secure a greater height."

Mr. Drexel said that while it was very cold, he did not suffer like he had done when he made his previous records of 6,750 feet at Lanark, Scotland, and 8,370 feet at Belmont Park, because he was more warmly clad.

In less than five minutes after Drexel began his flight the monoplane was only a speck in the heavy sky.

Drexel made circle after circle until it almost made one dizzy to watch the fast disappearing craft. When the monoplane finally disappeared from view on the northern horizon the curiosity of the crowd was at fever pitch and for more than an hour the one topic was Drexel. Finally when word reached the track that the daring aviator had landed safely at Oreland, 20 miles to the north, a mighty shout went from the anxious crowd and later when it was announced that a new world's altitude record had probably been made the cheering was renewed with more vigor.

Flights in Richmond.

Richmond, Va., Nov. 23.—Roland G. Garros and Rene Simon, both using 50 horse power Bleriot monoplanes, flew over the city of Richmond today. Garros flew during the morning, leaving the aviation field at 10:19 o'clock and returning seven and one-half minutes later, during which time he flew a total distance of nine miles, all directly over Broad street for its entire length. Garros used the racing Bleriot that John B. Moisant used when he won the Statue of Liberty international race.

Simon took 30 seconds more for his cross city flight than did Garros and then did not cover quite so much distance in a straight line, but he circled continually over one section of the town looking for his landmark. Both Garros and Simon flew at an altitude of 3,000 feet and their unfamiliarity with the appearance of the city hall tower, their turning point, caused them to travel farther than they had intended to fly. Both also gave a series of exhibition flights at the local aviation field after their cross city pilgrimages. Later still, Charles K. Hamilton and Rene Barrier gave a series of exhibition flights at the State fair grounds, the occasion being the four day meet of the International Company, which is presenting Moisant, Garros, Hamilton, Simon, Barrier, Frisbie and Seymous to the public.

WITH FINE OUTING CONVENTION ENDS

State Drainage Forces Enjoy a Day on Complimentary River Trip.

SESSIONS ON BOARD BOAT

Principal Officers Re-elected and Elizabeth City is Chosen as Next Meeting Place—Report of Committee—Notes.

The most largely attended, the most profitable and the most enjoyable meeting ever held by the North Carolina Drainage Association came to a close with a session on the revenue cutter Seminole on a delightful river trip down the historic Cape Fear from Wilmington yesterday. It was manifestly the greatest and most enjoyable convention ever held by the association and the visitors are unstinted in their praise of the manner in which Wilmington entertained them.

The next convention goes to Elizabeth City and practically all the old officers were re-elected. The association took a forward step yesterday in the adoption of resolutions favoring a drainage course at the A. & M. College, teaching of agriculture in the public schools, the relief from taxation of drainage bonds for a period of 15 years, provision by the next Legislature for a competent drainage engineer to work under the direction of State Geologist and the establishment by the State of ademonstration farm where alluvial soils exist.

The closing day of the convention began at 9:30 o'clock yesterday morning when the delegates and a goodly number of townspeople assembled at the government wharf, between Market and Princess streets, and embarked upon a trip down the Cape Fear river on the revenue cutter Seminole, Capt. R. O. Crisp, provided for by the boat committee of which Mr. Wm. E. Springer was chairman. There were between 150 and 200 to enjoy the trip, and it is needless to say that it was one of the greatest outings many of those aboard ever had. It was originally planned to stop at Fort Caswell for an inspection of one of the most modern fortifications on the Atlantic coast, but owing to the fact that a great many delegates desired to return in time to leave for their homes on the afternoon trains the visit to the fort was abandoned, the cutter returning to the city at 2 o'clock. However, the trip was immensely enjoyed and was undoubtedly the pleasantest feature of the entire convention.

Shortly after the boat headed back for Wilmington an elegant luncheon was served on the boat by Miss Eliza French and a number of asistants. The luncheon and the service was highly complimented by all aboard the boat. An efficient corps of waiters had been secured and the services were well nigh perfect.

Immediately after the luncheon the concluding business session of the convention was held, presided over by Mr. J. A. Brown, of Chadbourn, the president. The report of the committee on resolutions was submitted by Congressman John H. Small, of the Second North Carolina District, and they were unanimously adopted as follows:

"This association was organized for the purpose of promoting the Drainage of wet and overflowed lands in North Carolina. There are in this State, about 2,100,000 acres of unreclaimed swamp lands, and recent investigations have developed that at least 1,000,000 acres of this land may be profitably drained and reclaimed and subjected to cultivation, which lands are exceedingly fertile and productive. It is estimated that there are in addition, perhaps 6,000,000 acres of land now under cultivation, which are insufficiently drained, and therefore uncertain in the production of crops. These facts present a problem of vital economic importance, the solution of which should appeal to the progressive spirit of all citizens.

"It is admitted that drainage lies at the basis of successful agriculture, in all the coastal plain regions. Even if all the other factors necessary to the production of crops should exist, they cannot be grown upon wet lands, if the drainage is sufficient.

'But the promotion of agriculture and the resultant prosperity of the individual farmer is not the only purpose which would be subserved. Drainage affects at least two vital public conditions. The conservation of the public health is now universally recognized as one of the chief functions of the State. The elimination of preventable diseases and the maintenance of normal health in the individual means vitality and efficiency which are essential to economic growth and progress in all lines. The drainage of our wet lands is the primary essential in the conservation of the public health. The people of the State are now pressing with unprecedented activity a move-

ment for better highways. We are beginning to realize the important relation of good public roads to industrial growth and commercial expansion. No substantial and permanent highway can be constructed unless drainage is provided. Therefore, the public health and improved roads must wait upon drainage.

"Every thoughful citzen who is acquainted with our abundant resources must admit the necessity of attracting the right sort of settlers and home builders in our State. The tidewater section in North Carolina alone could provide homes for a population many fold in excess of the present number, and this added population would make for the greater prosperity of all. If we would attract home-seekers from the West and other desirable clases, we must offer them fertile lands, healthful conditions, good public roads, and good public schools. We are waging a successful crusade against ignorance, and it is within our power to provide the other essentials. We again repeat that drainage is a primary necessity, without which we can neither have the most productive lands, improved public health, better highways, or the most desirable immigrants.

'RESOLVED, That this Association request the Trustees of the State Agricultural and Mechanical College to make provision for a complete course of drainage engineering, and we commend to the young men of the State who are pursuing the study of agriculture, that they include in their course the essential problems of drainage. The President and Secretary of this Association are hereby directed to present a copy of this resolution, in person, if possible, to an early meeting of the Trustees of the A. & M. College.

"RESOLVED, That this Association unreservedly commend the law authorizing the teaching of agriculture in the public schools, and especially in the rural districts, and we urge that some of the elementary principles connected with drainage be included in the agricultural course. To this end, we request the State Superintendent of Public Instruction to communicate with the County Superintendents, and through them, with the teachers and district committees. The President and Secretary of this Association are directed to present this resolution to the State Superintendent of Public Instruction, and through him, to the next session of the Legislature.

"RESOLVED, That the Legislature be requested to enact legislation which shall relieve drainage bonds from all taxation, State, County or municipal, for a period of fifteen years, provided the Legislature has the constitutional power to enact such a law. We refer to all bonds which may be issued during the next fifteen years. We are advertent to the inhibition against exemption from taxation of private property, but we submit that these bonds are excluded from such prohibited class. Drainage is more than a semi-public function. The public health and the construction of highways are exclusively within the province of the State, and both are substantially, if not entirely, subserved and promoted by drainage. Whatever is lost in the way of public revenue will be more than met by the increased value of lands aded to the taxable property. We are constrained to regard the legislation of paramount importance in the successful organization and establishment of drainage districts throughout the State. The President and Secretary of the Association are directed to present this resolution at the next session of the Legislature, through the appropriate committees of both houses, and the President is authorized to appoint any additional members of the Association to join in the presentation and the promotion of such a law.

'RESOLVED, That we urge the Legislature, at the next session, to enact a law authorizing the State Geologic and Economic Survey to employ a competent drainage engineer, under the supervision of the State Geologist, who may be employed in visiting sections where drainage is contemplated, and confer with the land owners and make preliminary investigations, with a view to determining whether the said lands are susceptible of drainage, and within a limit of cost which would constitute a profitable investment, such investigation to be preliminary to the institution of a proceeding for the establishment of a drainage district, and that the necessary appropriation be made to meet the expenditure involved. We also urge the Legislature to appropriate a sufficient fund out of which may be paid the conpensation of the drainage engineer, as provided in Section 2 of the General Drainage Law of 1909, the said sum so advanced to be subsequently refunded.

"The President and Secretary of the Association are directed to present this resolution at the next session of the Legislature, through the appropriate committees of both houses.

"RESOLVED, That the State Department of Agriculture be earnestly requested to establish a demonstration farm at some point where the alluvial soil exists, with a view to demonstrating the productive capacity of the soil for the various crops.

'The President and Secretary of the Association are directed to present this resolution and to continue to urge the same upon the attention of the Department of Agriculture.

"RESOLVED, That this Association, on behalf of the people of North Carolina, express deep grattude to the United States Department of Agriculture, and particularly to the Bureau of Drainage Investigations of that Department, for the most helpful assistance and co-operation with the State of North Carolina, in the making of preliminary investigations and surveys, and for expert advice in the solution of many drainage problems. That the Secretary of the Association be directed to communicate a copy of this resolution to Hon. James Wilson, Secretary of Agriculture, and to Dr. C. G. Elliott, Chief of Drainage Investigations.

"RESOLVED, That the thanks of the Association be tendered to the Secretary of the Treasury and the Chief of the Revenue Cutter service for the courtesy extended in placing the Revenue Cutter 'Seminole" at the disposition of the local committee, and providing a most delightful trip down the Cape Fear river and to various points of interest.

"That we extend thanks to the Board of County Comisssioners of New Hanover County for the use of the commodious and comfortable Court Room for the sessions of this convention. That we also extend most grateful thanks to the Chamber of Commerce, the local committee and the citizens of Wilmington, for the many and delightful courtesies extended to the members of the Association, which have contributed in such large degree to a successful session and to the pleasure of the delegates. That we cannot forget the obligations which we owe to the press of the city of Wilmington and also of the State, in reporting the proceedings in furthering this great public movement, in which the press must be a most valuable auxiliary.

"Respectfully submitted,
JOHN H. SMALL, Chm'n.,
A. B. CROOM, JR.
J. S. MANN,
W. S. PRIVOTT,
W. C. STINSON,"
Committee.

President Brown said that he desired to express his personal thanks to the committee for its splendid work.

Dr. Joseph Hyde Pratt, secretary, reported for the membership committee of which he is chairman. There were 115 delegates registered for the convention, but there were more than 200 in attendance, some neglecting to register. On the registration books 23 counties were represented and one person from Virginia and another from Georgia. Dr. Pratt said that about 40 had paid their annual dues. Some 13 or 14 paid their dues before the termination of the trip, bringing the number up to 53.

The committee on next place of meeting and nominations made its report through Dr. John M. Faison, Congressman-elect from the Third District. Elizabeth City was recommended as the next place of meeting, the date to be left with the secretary and treasurer, and officers for the ensuing year were recommended as follows:, the entire report being unanimously adopted:

President—J. A. Brown, Chadbourn.

Secretary and Treasurer—Dr. Joseph Hyde Pratt, Chapel Hill.

Vice presidents, one from each of the counties which have become interested in drainage:

Bladen county—O. L. Clark, of Clarkton.
Beaufort—John Wilkinson, Belhaven.

Rockingham—Mr. Richardson, Reidsville.
Iredell—Mr. Armfield, Statesville.

Congressman Small took charge of the meeting at the conclusion of the report and before submitting the report to a vote of the convention made a few remarks in which he paid tribute to President Brown and Dr. Pratt. President Brown and Dr. Pratt thanked the association for again honoring them and pledged to give the cause their nearty support as they have in the past.

Among the Wilmingtonians noted on the trip were: Mr. Wm. E. Springer, chairman of the committee which arranged the delightful outing; Messrs. D. C. Love, B. F. Keith, James Owen Reilly, H F Wilder, James F. Woolvin, C. Van Leuven, H. deW. Rapalje, B. O. Stone, M. G. Tiencken, F. E. Hashagen, Will Rehder, C. W. Polvogt, C. W. Worth, E. Norden, L. H. Simmons, Neill McEachern, Joseph H. Watters, A. B. Skelding, Arthur Williams, J. A. McGeachy, Emanuel Bear, Capt. W. A. Sanders, Capt. Earl I. Brown, Dr. D. W. Bulluck and Dr. John Thames.

The party returned to the city shortly before 3 o'clock, all declaring it to have been the most pleasant and most enjoyable event ever given in connection with the drainage convention. Most of the delegates left in the afternoon and last evening for their homes.

The visitors upon leaving the boat expressed their sincere thanks to Chairman Springer for the very delightful trip and also to Capt. R. O. Crisps, of the cutter, both of whom left nothing undone that would tend to the pleasure of the visitors. In addition to luncheon, other refreshments were served on the trip. The committee had in charge of this feature Julius Murray, the well known colored caterer, who has had wide experience in the service of refreshments to large crowds on such outings.

For Headaches.

There Isn't Any Headache Remedy That Does The Work Like Hicks' CAPUDINE.

It gives quick relief from Headaches of all kinds, including Sick or Nervous Headaches, and Headaches caused from heat, cold, grip or stomach troubles.

Capudine is also the best and quickest remedy for attacks of Cold or Grip. It soon relieves the aching and feverishness and restores normal conditions.

Capudine is liquid—easy and pleasant to take—acts immediately. 10c., 25c. and 50c. at drug stores.

DEATHS IN FAYETTEVILLE.

Mr. James Cooper Stedman and Miss Atkinson—Boy Accidentally Shot.

(Special Star Telegram.)

Fayetteville, N. C., Nov. 23.—Miss Janie Atkinson, of this city, died suddenly at her home on Burgess street, about 5 o'clock this afternoon, from a form of apoplexy. Miss Atkinson was the daughter of the late James W. Atkinson, who died about a year ago, and Mrs. Mary Atkinson. She was an estimable young woman, with many friends.

Mr. James Cooper Stedman, of this city, passed away at St. Luke's Hospital this morning in the 87th year of his age, his death coming unexpectedly, though Mr. Stedman had for a number of years been somewhat of an invalid. Mr. Stedman was born in Gates county and lived in Pittsboro until 1853, when he removed to Fayetteville. He was long a prominent merchant and bank officer of this city, though his last years were spent in the retirement of a peaceful old age. He leaves no immediate family, but a number of relatives among whom are Frank H. Stedman, of this city, Major Chas. M. Stedman, of Greensboro, and Miss Fannie Stedman, of Wilmington.

While drawing his shot gun from the rear of a buggy on returning from a hunting trip, Roseberry McCaskill, son of Postmaster A. L. McCaskill, of this city, was this afternoon shot and seriously wounded by the accidental discharge of the gun. The injury will not prove fatal.

The Observer this afternoon prints the following sketch of the life of Mr. Stedman:

"James Cooper Stedman was born in Gates county, N. C., on December 23rd, 1823, and lacked only one month of being 87 years old. Most of his young manhood, up until about 1853, was spent at Pittsboro, N. C.; from Pittsboro he came to Fayeteeville and was engaged in business with the firm of Stedman & Horne, merchants, with which firm he remained until the organization of the Bank of Clarendon. He was for a number of years bookkeeper of the Bank of Clarendon. Subsequently, upon the organization of the People's National Bank of Fayetteville, he became connected with that institution, and remained with it until feeble health required his retirement from business. For a number of years he has not been actively engaged in any business.

"Mr. Stedman was the nephew of the late Nathan A. Stedman, of Fayetteville, and the first cousin of Major Charles M. Stedman, of Greensboro, Miss Fannie Stedman, of Wilmington, and Mr. Frank H. Stedman, of Fayetteville. He was also a second cousin of our townsman, Mr. E. A. Poe, Mrs. Fannie Hall, of Sanford, and Mrs. T. L. Vaughan, of Winston, are his nieces and he had several nieces living in Gates county and in Virginia.

"While Mr. Stedman, owing to his being an invalid, was unknown to perhaps a greater portion of our community, he was much beloved and highly esteemed by all that knew him. There was no impairment of his mental faculties, and it was a subject of comment among his friends how clear his mind was for one of his age. He was truly a gentleman of the old school, ever courteous, patient and polite, with a winning smile for all of his friends who called upon him, and always disposed to do any kindly service in his power. There are many sad hearts among those who knew him best, at the passing of this good man

"The funeral services will be conducted from the residence of Mr. E. A. Poe, Haymount, at the hour of three P. M. tomorrow."

RAILROADS AND TRUSTS.

Criticised in Resolutions Introduced at Mississippi Congress.

San Antonio, Texas, Nov. 23.—Railroads and trusts were criticised this afternoon in resolutions introduced by Governor Stubbs, of Kansas, and unanimously adopted by the trans-Mississippi Commercial Congress.

One set urges the National Congress to enact legislation providing for the valuation of railroads in detail.

A second set calls upon the National Congress to amend the Sherman anti-trust law, making it mandatory and providing imprisonment for all violations.

Another resolution urges Congress to enact a law to regulate the issuance of stocks and bonds of interstate railroads without encroaching upon the rights of States to regulate their corporate and domestic affairs.

Still another is worded: "That we urge upon the Interstate Commerce Commission that it correct these abuses by prescribing rates to the gulf ports which with due regard to cost of service and distance are reasonable and which are not based on rates to and through these so-called gateways, plus the rates back over the same line and thence to the gulf."

Norfolk, Va., Nov. 23.—Fire today partially destroyed in Portsmouth, Va., an old frame house occupied by the father of Grover Cleveland, who, before the ex-President's birth, was pastor of the Portsmouth Presbyterian church. It was one of the oldest houses in Portsmouth.

"DEMOCRAT" RUNG THE BELL.

Mr. D. L. Gore Agrees That Political Change is Good.

Editor Star:—The article signed "Democrat" in your Saturday's paper, is first-class and I say Amen to it, as far as it goes, but don't think it goes quite far enough. I think many of these States had gone Republican so long that they had a lot of leaders so entrenched as bosses, some in office and some not in office, but who could pull a string in county, city, State or National government, and have things done, and mean things at that, most of the time—and many of the better element of the Republican party stayed away from the polls and allowed the election to go Democratic by default to get them out. In the State of New York the day of election it was rainy and the country voters did not turn out well, but the voters in the towns and cities did, and there (in town and city) is where the monied interests are strongest. If the best element of the Republican party will get together and weed out the fossilated and the political grafters from their leaders and put men of csaracter and capacity in their stead all will be well again with the Republicans in those States. What has happened is the very medicine they needed and if some other States like Pennsylvania and many others of each political faith, which have had one party in power for a long time, could take a similar dose it would help the body politic. There is no State or Nation where one party stays in power a long time but what considerable corruption will creep into governmental affairs. Let the good work go on.

Yours truly,
D. L. GORE.

BIRDMEN AT GOLDSBORO.

Amateur Exhibition There Next Week—Record Flights.

(Special Star Correspondence.)

Goldsboro, N. C., Nov. 23.—The aviation exhibition to be given in Goldsboro for four days next week, beginning Wednesday, Nov. 30, with the noted monoplane machine, and by the same operators and with the same machines that have made record flights, will be one of the greatest events in the history of the city.

The birdmen with their machines who are to fly here are the same who are now giving daily demonstrations in the big populous meets in the North. They will fly on Thanksgiving Day at the big aviation meet in Newark, N. J., and will come direct from there to Goldsboro.

Mr. J. G. Stratton, the chief of staff, who will fly here, has done some exceptionally fine work in the mastery of the air in a monoplane. He won high honors in the recent Montreal and Toronto meets, and after these he flew from Long Island across the sound into Connecticut, and all his flights have been marked by dexterous management of his craft and splendid exhibition of the possibilities of the monoplane.

BEST NORFOLK SERVICE.

The Atlantic Coast Line's through night service between Wilmington and Norfolk has pre-eminent advantage, in that it is the only through car or double daily route and does not require a midnight or early morning transfer of trains and depots.

Sleeper leaves Wilmington 7:00 P. M., arrives Norfolk 8:00 A. M. next day. Parlor car leaves 8:40 A. M., arrives Norfolk 5:55 P. M. same date.

No change of sleeping cars or day coaches between Wilmington and Norfolk, and the trains run every day in the week. For reservations and further particulars, call 'phone 160.

CHRISTIAN CHURCH.

State Convention Continues Its Sessions at Washington, N. C.

(Special Star Telegram.)

Washington, N. C., Nov. 23.—The second day of the session of the of the State convention of the Christian Church held in this city began with a praise service conducted by Rev. Robt. V. Hope, pastor of the local church, and was followed by the address of welcome delivered by Rev. W. A. Davis and response by Rev. J. B. Tingle, of Ayden. Then came the enrollment of delegates and about 200 were placed on the roster. The president, Rev. J. W. Hines, of Rocky Mount, made his report after which came the roll call of ministers and three minute reports on the year's work done by each. Then came the recommendations of the State Board and a general discussion. This completed the morning session. The afternoon session began with "Song and Praise Service" conducted by Rev. J. W. Perry, of Kinston, after which came the appointment of committees by the president, then the report of the corresponding secretary, C. H. Morton, of Wilmington, N. C., after which there was a general discussion.

Mr. George Hackney, the treasurer, made his report followed by a report on the Atlantic Christian College by Dr. J. C. Caldwell, of Wilson, and another discussion. The days work ended with a song and praise service at night, at which time the convention sermon was preached by Rev. B. T. Bitting, of Leaksville, and a special address on State Missions was by B. F. Smith, of Kinston. The convention will very probably complete its work tomorrow. Among the prominent visitors, Rev. A. McLean, of Louisville, Ky., president of the Church Missionary Society; Rev. J. D. Waters, of Harrisonburg, Penn., Rev. G. H. C. Story, of Winston-Salem; Rev. R. M. Hopkins, of Cincinnati, Secretary of the Bible School of American Missions, and Mr. Geo. W. Mackey, of Kansas City, Secretary of the Church Extension Board.

SILENTLY SUFFERED UNTOLD AGONIES

Mrs. Bazemore Bore Terrible Pain Without Complaint, Because She Feared Operation.

Durant's Neck, N. C.—Mrs. Emma Bazemore, of this place, says: "Words fail to express my appreciation and gratitude for the benefit I received from Cardui. I suffered agonies from womanly troubles. I tried different doctors, but they didn't help. The last one I went to said I needed an operation, so I agreed to it, and bore these terrible pains. I felt better, but only for a short time, and soon the misery was worse than ever before. I began to use Cardui, and it made me feel entirely different. Now I am the picture of health, weighing 170 pounds. Before I started the treatment, I could not do my housework, and I feel so much better."

Now every medicine cannot be depended on to cure a woman's ills. Not every tonic will bring back a woman's health. Cardui has done both for thousands of women, because of its unique, specific, curative qualities, especially adapted for use in treating ailments peculiar to women.

N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper, on request.

DOINGS AT STATE CAPITAL

Mr. Henry Miller's Promotion Well Deserved—Another Farm Corporation—Negro Purported to Represent Company.

(Special Star Correspondence.)

Raleigh, N. C., Nov. 23.—While the people of Raleigh are glad for any business promotion that comes to Henry W. Miller, for many years assistant to the first vice president of the Southern Railway Co., they are expressing exceeding regret at the fact that his latest advancement will change his residence from Raleigh to Atlanta, where he is to go December 1st, to take up the duties of assistant to President Finley, of the Southern Railway Co.

Mr. Miller has lived in Raleigh all his life. He was as a small boy, a telegraph messenger and newsboy, always aggressive and energetic in his work. It was in 1885 that he was made loading clerk and assistant telegraph operator at the local Southern freight office. Close application to duty brought promotion that ultimately put him in the position of private secretary to Col. A. B. Andrews, first vice president of the Southern. Then there was the advancement to assistant to the first vice president that he has held for a number of years, demonstrating his business capacity as a railway official as the business in the office of the first vice president has steadily increased.

In addition to his railway business Mr. Miller has been devoting personal attention for several months to the work of completing the splendid $60,000 church of the Good Shepherd (Episcopal) which is to be the handsomest house of worship in this section of the country. Fortunately he has this so far advanced now that completion without further interruption is assured.

Another farm corporation receives a charter from the Secretary of State, making a dozen or more chartered within the past few months. The latest is the Green Farming Co., Aberdeen, capital $16,140 by J. S. Green, H. A. Page and others. The corporation proposed to do general farming on a large scale.

There went the rounds of a number of prominent residences here a few days ago a negro representing himself to be in the employ of the Raleigh Gas Company, and asking to be allowed to inspect the gas and electric equipment of each. This was permitted. Now it develops that the gas company sent out no such man. The fellow has been arrested and identified. He claims to be Ed Sunday, from New Hill, but fails to explain his conduct. Some fear that he was gathering data to be used later in a series of burglaries as he seemed to especially note the arrangement of the house and rooms and location of furniture.

HONOR BISHOP HAID.

Notable Celebration at Belmont on Thanksgiving—Anniversary.

Charlotte, Nov. 23.—The Catholic world of Charlotte will make a pilgrimage to Belmont for the second time this Fall, on Thanksgiving Day.

The day will mark another epoch in Catholic history of this section.

The 25th anniversary of Bishop Haid's consecration as Abbot of Belmont Abbey will be marked by a great jubilee, which will call to the Abbey Catholics from far and near. With pomp and ceremony the anniversary will be celebrated. The celebration begins tomorow afternoon when the presentation ceremonies take place. Mrs. Frances Fisher Tiernan, of Salisbury, has written a poem for the occasion, which Bishop Haid will read in answer to the congratulatory address. The jubilee sermon will be preached Thursday morning at 9:30 by Bishop Northrop, of Charleston.

The jubilee banquet takes place at 1 o'clock.

In the evening at 7:30 there will be an illustrated lecture on the subject, "Twenty-five years in Belmont Abbey."

The exercises will close on Friday at 9 A. M. with pontifical memorial services for all the departed benefactors of the Catholic church in North Carolina.

Belmont Abbey, as is known, was recently elevated to the rank of Cathedral Abbey, the only abbey of that high rank in America.

SAYS MRS. MARTIN IS INSANE.

Counsel of Defense Rest the Case.—On Trial for Murder.

Newark, N. J., Nov. 22.—With the declaration by Dr. Walter Washington, an alienist, that she is insane, counsel for Mrs. Caroline B. Martin rested their case today in the hearing to prove that she should not be brought to trial charged with the murder of her daughter, Ocey Snead, the East Orange bath tub victim. Dr. Washington testified he is positive that Mrs. Martin does not realize her position or her need of having counsel.

"A common delusion of insane people is to believe they are sane and the rest of the world insane," the witness said, when asked to explain the fact that Mrs. Martin has insisted she is fully responsible.

"Does Mrs. Martin say she is sane and the rest of the world insane?"

"I do," interrupted the woman. "I mean Essex county, New Jersey," she added.

INVITED TO CHARLOTTE.

Wilmington Association Invited to Send Representatives.

Charlotte, N. C., Nov. 23.—The Charlotte-Wilmington highway committee has been invited by the Greater Charlotte Club to come here on Nov. 30 to meet the executive committee of the state highway organization at Hickory, Nov. 2nd, to see if arrangements cannot be effected looking toward unanimity of action in regard to having the state highway continue through Charlotte. Mr. Clarence Keuster, of the Greater Charlotte Club and Mr. R. O. Alexander, have the matter at heart and in hand. It may, therefore, be expected to succeed.

MR. DUKE GIVES $11,000.

Durham Taxes Dancing—Declamation Contest—Automobile Tour.

(Special Star Correspondence.)

Durham, N. C., Nov. 23.—Last Sunday Mr. Benjamin N. Duke gave $11,000 to the cause of missions. He attended the services at Memorial Methodist Church Sunday morning when Miss Daisy Davies, field secretary of the Board of Missions of the Southern Methodist church, delivered one of her stirring lectures on missions. The church is making an effort to build a mission school in Rio de Janeiro, the greatest city on the South American Continent, and it will require $250,000 to establish the school which they want there. Miss Davies is touring the South in the interest of the movement, and it was after hearing her inspiring lecture Sunday morning, that Mr. Duke announced his intention to give the sum.

At the regular mid-monthly meeting of the Board of Aldermen Monday night an ordinance was adopted placing a tax on dancing halls. The ordinance reads as follows: "Upon each hand every hall or room where dancing is carried on, and to which an admission or other fee for attendance thereat is charged for profit, a license fee of two dollars for each day or night." The ordinance is to take effect December 1, 1910, and will no doubt bring many an unwilling dollar from the pockets of the waltzers.

Dr. W. K. Boyd, of the Department of History of Trinity College, is to read a paper in connection with the programme for the 26th annual meeting of the American Historical Association to be held in Indianapolis, Ind., December 27th to 30th. His subject will be "North Carolina on the Eve of Secession."

The Inter-Scholastic Declamation Contest will be held at Trinity College on Friday of this week. It is to be participated in by representatives from high schols from Virginia, North Carolina and South Carolina. The contest promises to be a lively one and great interest is being taken in it, not only at the college, but by the schools of the city as well. The medal to be awarded is now on display in the window of the jewelry store of Snider-Umstead Company, and is a very beautiful one. On one side is the Trinity seal and on the other that of the "9019" Society, which is giving the medal.

A party of automobilists who are to make a trip from New York to San Francisco in a Mud Hen car, are scheduled to stop in this city on their trip. They left New York last Monday, and the trip will cover about 5,000 miles, and is to be made in 35 days. They intend to go at a rate of 150 miles a day, and will bear a Christmas greeting from Mayor Gaynor to Mayor McCarthy, of San Francisco, where they are expected to arrive on Christmas Day. Much of the territory covered will be over the worst roads and in anticipation of road troubles such as being stalled in mud or sand, the car will be equipped with a complete wreckers' outfit, and a mechanician will be along.

AFFAIRS AT WHITEVILLE.

Paving Material Adopted—Land Sale—Other News Notes.

(Special Star Correspondence.)

Whiteville, N. C., Nov. 21.—The Mayor and Aldermen met last evening to make their final decision about adopting a paving material fo rthe streets of Whiteville. Several biders were on hand from Northern cities, each of course pressing the claims of his own goods. When the matter came up for discussion it was found that the members of the board were divided, some strongly urging the adoption of the Beech Island cement-gravel, and others insisting that crushed stone, covered with ashhalt, was best. Mr. W. L. Spoon, the good roads expert, had strongly recommended the cement-gravel, and his opinion was endorsed by Mayor Davis, who has made a personal inspection of roads paved with that material and said it was the best and cheapest the town could use, with its limited bond issue. Upon a vote being taken it stood three for cement-gravel and two for stone, so the Beech Island material was adopted. Work will at once start paving the streets, and Madison avenue first taken in hand. The estimates for paving that street from the depot to the court house ranges from $6.000 to $10,000.

An important land sale took place Tuesday afeernoon in Whiteville, and surprisingly good prices were realized, considering the location of the property, which was out on the street leading to Chadbourn, beyond the settled part of our town. The property sold was something less than four acres, given by Mrs. Johnson to the Baptist mission Board, and some lots belonging to Mr. J. L. Memory. The mission Board tract was cut into 22 lots and they brought $1,396.50, an average of $64 per lot, or about $400 per acre. Only 12 of Mr. Memory's lots were sold, and they brought fair prices. Mr. B. H. Harnly conducted the sale.

Mr. R. P. Britt, a progressive farmer of this county, this year raised 90 bushels of corn per acre on five acres, and he used but little fertilizers. Mr. W. H. Stanley, near Pineway, made nine heavy bales of cotton on ten acres, without much fertilizer.

Columbus is the first county to start work on the Wilmington-to-Charlotte highway. The convict force, numbering 50 hands, have set to work at Boardman, and they will complete a splendid highway to Whiteville, on the route mapped out by the Pathfinders. Our people are in earnest about having this great artery of travel, and are proving their faith in their works. Columbus county always leads in whatever she undertakes.

An idiotic white boy near Cerro Gordo, during one of the cold afternoons last week, secured a gun and started out hunting. Not returning at nightfall, searching parties were organized. Some time during the night he was found lost in a swamp, wandering aimlessly about, and nearly frozen. But for the timely rescue he might have met his death.

There are a number of cases of smallpox around Evergreen, in this county, but they are of a mild type and the authorities are having them quarantined.

We guarantee you a hot time. Gas Coke, $5.00 per ton. no 22-24-2t.

AFFAIRS IN GRANVILLE.

Superior Court in Session—Lawrence Davis Case—Corn Contests.

(Special Star Correspondence.)

Oxford, N. C., Nov. 21 1910.—Granville Superior Court convened today with Judge C. C. Lyon on the bench. S. M. Gatis of Hillsobro the solicitor for this district is present on duty. Two cases were disposed of today, the one state vs A. A. Lyon for assault on H. G. Coleman, fined $50.00, the other Taylor Barnes for retailing whiskey, fined $30.00.

The most important case on the docket for this term is that of state vs. Lawfence C. Davis for the murder of Braxton Bragg. This murder was committed on the 10th of Septemerb in the southern part of the county. These ewo men with others were enjoying a disreputable carousal at a house of not the best repute and the lady and the whisky together brought on the quarrel that ended in the shooting of Bragg. Braxton Bragg has been noted for years as the king of the "Hurricane" and was somewhat of a desperate character. It is reported that he had likkd several men during his reign, which ended somewhat after the style of the kings of old. on the 10th of September 1910. The trial is set for 2:30 tomorrow.

Reports are coming in every day from the corn contest boys. It is esdmated that over one thousand barrels of corn will be raised in the county this year by these boys. One boy reports that putting the forage received from his acre at a fair price it would more than pay for the cost of the acre of corn and give a profit without considering the grain. Or as he puts it the net cost of his corn was fourteen cents less than nothing. Improvement in agriculture in Granville has passed beyond the point of enthusiasm and become a ruling passion.

A most successful county fair has just been held and next Saturday will see the winding up of second year's contest.

The two other things planned for next year along this line are the establishment of an agricultural high schools and creation of the office of county commissioner of Agriculture.

MRS. ARMFIELD DEAD.

Mother of Late Adjutant General Passed Away in Statesville.

Statesville, N. C., Nov. 22.—Mrs. R. A. Armfield, who came to Statesville from High Point 10 days ago to spend a while with her daughter, Mrs. E. G. Gilmer, at Hotel Inedell, died early this morning and the remains, accompanied by a large pary of friends and relatives, left on the noon train for Mount Airy, where the funeral and burial will take place tomorrow.

Mrs. Armfield was the widow of the late Marcus Armfild, of Mt. Airy. She has been in poor health for some time and grief over the recent death of her son, J. F. L. Armfield, of Fayetteville, hastened her death.

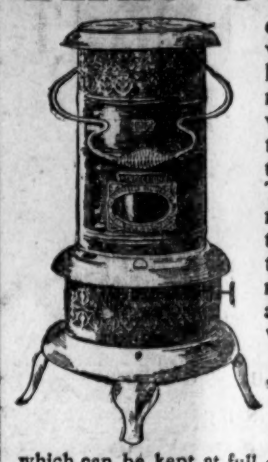
WILLIAMS' KIDNEY PILLS
Have you overworked your nervous system and caused trouble with your kidneys and bladder? Have you pains in loins, side, back and bladder? Have you a flabby appearance of the face, and under the eyes? A frequent desire to pass urine? If so, Williams' Kidney Pills will cure you—Druggist, Price 50c.
WILLIAMS MFG. CO., Props., Cleveland, Ohio

That Cold Room



on the side of the house where winter blasts strike hardest always has a lower temperature than the rest of the house. There are times when it is necessary to raise the temperature quickly or to keep the temperature up for a long period. That can't be done by the regular method of heating without great trouble and overheating the rest of the house. The only reliable method of heating such a room alone by other means is to use a
PERFECTION SMOKELESS OIL HEATER
Absolutely smokeless and odorless
which can be kept at full or low heat for a short or long time.
Four quarts of oil will give a glowing heat for nine hours, without smoke or smell.
An indicator always shows the amount of oil in the font. Filler-cap does not screw on; but is put in like a cork in a bottle, and is attached by a chain and cannot get lost.
An automatic-locking flame spreader prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so that it can be cleaned in an instant.
The burner body or gallery cannot become wedged, and can be unscrewed in an instant for rewicking. Finished in japan or nickel, strong, durable, well-made, built for service, and yet light and ornamental. Has a cool handle.
Dealers Everywhere. If not at yours, write for descriptive circular to the nearest agency of the
Standard Oil Company
(Incorporated)

New Goods of Quality
Just Received

THE MORNING STAR

Published by the WILMINGTON STAR COMPANY Wilmington, N. C.

Entered as second-class matter at the postoffice at Wilmington, N. C. under act of Congress, March 2nd 1874.

FULL ASSOCIATED PRESS REPORT.

PUBLISHERS' ANNOUNCEMENT.

THE MORNING STAR, the oldest daily newspaper in North Carolina, is published daily except Monday, at $6 per year, $3 for six months, $1.50 for three months, 50 cents for one month, served by carrier in the city or by mail.

THE SUNDAY STAR, by mail, one year, $1; six months, 50 cents; three months, 25 cents.

ADVERTISING RATES may be had on application and advertisers may feel assured that through the columns of this paper they may reach all Wilmington, Eastern Carolina and contiguous territory in South Carolina.

Obituary sketches, cards or thanks, communications espousing the cause of a private enterprise or a political candidate, and like matter, will be charged at the rate of 10 cents per line, or if paid cash in advance, a half rate will be allowed. Announcements of fairs, festivals, balls, hops, picnics, society meetings, political meetings, etc., will be charged under same conditions except so much thereof as may be of news value to readers of the paper.

Advertisements discontinued before expiration of contracts are charged transient rates for time actually published. Payment for transient advertisements must be cash in advance. Contract advertisers will not be allowed to exceed their space at same rates or advertise anything foreign to their regular business without extra charge. Advertisements to occupy special place will be charged for according to position desired.

TELEPHONES: Business Office No. 51; Editorial and Local rooms No. 61. Call either if the other doesn't answer.

COMMUNICATIONS, unless they contain important news, or discuss briefly and properly subjects of real interest, are not wanted; and if acceptable in every other way, they will be invariably rejected unless the real name of the author accompanies the same, not necessarily for publication but as a guarantee of good faith.

Thursday, November 24, 1910.

All of us can't be President, so we may as well give in to Woodrow Wilson or Judson Harmon.

It is said the sugar trust has been caught defrauding the government again. If the saccharine swindlers will rob their tariff benefactor there is no telling what it does to consumers.

Says the Charlotte News: "'Winsome Wilmington'" is the latest characterization of the delightful city by the sea. We supose to carry the thing out, it will be Rabid Raleigh and Grouchy Greensboro." Chesty and Cheerful Charlotte should not object to Glorious Greensboro and Royal Raleigh.

Good roads, drainage, rural free delivery, rural telephones, good schools and our good people are what will make eastern North Carolina get on top in a hurry. Let us give thanks that we have most of these blessings and are in a fair way to have all of them in a greater degree than we now have them.

During the campaign Col. Roosevelt declared he was going to chase the crooks. He can give us a good imitation of a real chaser if he will go to Washington when Congress meets and jump the bunch constituting the Indian land lobby and figuring in the public land syndicate which has been doping Uncle Sam.

The Hon. S. S. McNinch, who is a clever Charlotte gentleman when he is not a hankering after a seat in Congress as a Republican, is performing an amusing stunt by going around telling that Wall Street beat him for Congress. The strong probability is that Wall Street can prove an alibi, so Mr. Mc could have made a stronger allegation by saddling the blame on "mockum."

Says the Durham Herald: "While not speaking by the book, we do not mind saying that Durham will do her part toward any great public highway that wants to run through the county." Whenever a newspaper can speak so confidently and authoratively of its county, it is a sure sign of its progressiveness and genuine desire for development. All counties ought to reach that stage of progressiveness.

The Boys' Corn Clubs in North and South Carolina are doing two things of special significance. They are demonstrating that from 100 to 200 bushels of corn per acre can be produced on Carolina lands by boys and girls. They are inspiring young Carolinians with a spirit of enterprise and enlarged endeavor. The sum total af the endeavor of the young growers and their big yields of corn is that they furnish the most powerful advertisement of the resources and possibilities of this country as an unrivalled agricultural region.

Frequently the minority of a party represents the wisdom of the party. We have seen that illustrated in both the Republican and Democratic parties. During the free silver craze the minority of the Democratic party demonstrated the best judgment. During the tariff protection craze the insurgents in the Republican party represented the only safe and sane course. The defeat of the Democratic party in previous campaigns and the defeat of the Republican party in the last campaign fully vindicated the position of the minorities of the two parties.

GOOD ROADS COMING.

One of the most gratifying evidences of the progressive spirit and of the inspiration for development of the counties in this part of North Carolina is the increasing interest and active efforts in behalf of good roads construction. New Hanover county has led the way, as every principal public road in the county is a magnificent macadam highway, affording the quickest and most economical transportation for rural traffic and pleasure. New Hanover's network of good roads, with the tremendous beneficial results which have followed their construction constitutes a conspicious example for the surounding counties to emulate. It means a comparative demonstration of what good roads have done in the way of making farming easier, more economical, more profitable and more enjoyable, while so tremendously increasing land values that the accrument annually of the interest on New Hanover's good roads bonds amounts to the merest bagatelle. The fact is, the greatly increased values in the county, increased production and consequent creation of wealth makes a bond issue look like a speck on the wall in comparison with the tremendous results.

Columbus county, which is making wonderful strides towards development on the broadest lines, is going to be a god second to New Hanover, if, indeed, "prosperous Columbus" will not sooner or later show New Hanover how to do things. The Star's alert and intertaining Whiteville correspondent from day to day tells us of progress and prosperity in Columbus. It is ever an entrancing story that we get from "progressive Columbus." The fact is, Columbus is prosperous because her citizens got a move on them and became progressive. Her people made up their minds to make something of their splendid opportunities and they are doing it. They are going to do more of it, and if we ever take a notion to emigrate we will have to consider Columbus. This shows that when the progressive people of a county do things they attract attention to their county and give it practical publicity that is bound to be effective.

The Star's Whiteville correspondent in yesterday's paper tells us that Mr. Clyde K. Council, of Wananish, who is the progressive leader of the good roads movement in Columbus county, has made the declaration that the good roads advocates intend to have the people vote upon a bond issue to build good roads and that he has no doubt of the nedorsement of a good roads bond issue at the polls. The correspondent goes on to say that the Columbus farmers are "fast getting educated as to the importance of good roads and are anxious to have them made." One of the arguments for good roads in Columbus is that 'one-half of their cost will come out of foreign corporations and 30 per cent. of the remainder from manufacturing enterprises and the incorporated towns, so that farmers will have only 20 per cent. of the burden to bear and be the greatest beneficiaries."

That certainly ought to cinch the good roads issue for Columbus, and we should say that no farmer with the logic of those facts before him would stick in a vote against bonds. These facts show that the farmers have everything to gain and nothing to loose. They will pay 20 per cent. of the tax and get 100 per cent. of the benefit. Clyde Council is a good man to engineer the road movement in Columbus and men like him are big assets to any county. The Star is rejoiced to see its Columbus friends manifesting a progressiveness that is attracting wide attention to their county and it wishes for them a speedy bond issue for that greatest of developers—good roads.

The Star is also gratified to note that Pender county is going to get out of the kinks. We are satisfied old Pender is going to get into the good roads game. Pender has had a live and active number of delegates in Wilmington during the session of the drainage convention and on Tuesday afternoon they held a conference at The Orton to take steps towards beginning a good roads campaign in Pender. There is strong sentiment in Pender in favor of a bond issue for good roads and when proper sentiment is worked up it is proposed to call such an election. At the Orton House conference twelve or fifteen of Pender's prominent citizens unanimously agreed to return home and begin at once a vigorous good roads campaign. It ment in the county. The massmeet- of the citizens of Pender county to be held at Burgaw about noon in the first Monday in December for the purpose of considering plans for the organization of a county good roads association as the best means of creating a strong good roads sentiment in the county. The mass meeting called at Burgaw is for consultation and it is hoped the citizens of Pender county will go to the meeting and participate with an enthusiasm and earnestness that will augur success. Let our Pender friends be up and doing.

We believe the importance of good roads is so thoroughly recognized by every intelligent citizen that the only question about thier construction is the plan of providing the funds to carry on the work. Some good citizens favor a special tax instead of a bond issue, but there is not a single county in any of the States building good roads where the special tax plan was followed but that has adandoned that method for a bond issue. Experience in good roads construction has taught that a special tax is not only slow but impracticable. The experience of numerous counties, New Hanover for one, is that a special tax means roads piece meal and that no genuine progress was possible till bonds were isued and the work undertaken in dead earnest. The special tax is a makeshift, whereas a bond issue embodies and sustains a definite policy and well backed plan. A special tax places the burden on the taxpayers of today. A bond issue divides the tax between the good roads builders and prosterity which is to share the benefits to a greater extent than will the taxpayers of today.Bonds distribute the burden and is like borrowing money from the future to build roads today. A special tax means temporizing with good roads. A bond issue means money now to build good roads right now. If either plan is adopted it means a tax, but the lightest tax is that of the interest on road bonds. Therefore, a bond issue provides the wisest, the most feasible, the most practical, the most economical, the most effective and the most immediate and satisfactory method of financing road construction.

Sampson county, one of the finest of our eastern North Carolina counties, has gotten a move on her and is building good roads. The campaign stage for good roads building has been passed in Sampson and her people have gone to work to construct highways that are alreay bringing about present and prospective development. Sampson is making progress and there is no reason why all the neighboring counties should not do the same.

The splendid old county of Duplin is also coming to time and we hope to see the fertile lands of that county developed by the magic force of good roads. A massmeeting of the people of Duplin will be held at Kenansville on the first Monday in January for the purpose of forming a good roads association. Dr. Joseph Hyde Pratt, State geologist, and Editor H. B. Varner, of the "Southern Good Roads" magazine, Lexington, N. C., will be present to deliver addresses. All the good citizens of Duplin should be there and display the triumphant colors of progress. Duplin cannot afford to be the undeveloped centre of a good roads circle.

GOOD ROADS AND DRAINAGE.

There are two big movements in North Carolina—good roads and drainage. Modern highways and scientific drainage not only demonstrate progressiveness, but they typify a higher civilization. The Star is glad these two powerful factors for the development of North Carolina have been accentuated in Wilmington this week during the annual convention of the North Carolina Drainage Association.

Somehow or other, the good roads proposition appears to want to keep company with the drainage proposition. So mote it be. They are the biggest propositions which North Carolinians have on their hands, and when you see a man interested in or attending a drainage or good roads convention you can pick him out as one of the most public spirited, enterprising and successful men in his county. There is no use to ask anybody about him. If he has the good roads habit and well fixed drainage ideas, they speak for him.

During the sitting of the drainage convention during the last few days we have contemplated with extreme satisfaction the presence of so many of the representative citizens of New Hanover's sister counties, to which drainage and good roads mean more than to most of the other counties in the State. It has been inspiring to note their deep interest in the purpose and work of the drainage convention, while they have found it impossible meanwhile to keep from mixing the good roads question along with it. It means the creation of more sentiment, a strengthening of purpose and a broader dissemination of the spirit of progressiveness all around us. The result will be a forward movement that means a tremendous development in New Hanover, Brunswick, Columbus, Bladen, Robeson, Pender, Duplin, Sampson, Onslow and other counties destined to be the garden spot for the trucking and agriculture upon which the millions of consumers in the Northern markets will more and more depend as those millions increase year by year.

Drainage will not only benefit our lands and reclaim the most fertile and productive areas in this portion of North Carolina, but it will make this country more healthful and desirable as a place of habitation, rendering it beneficial to its inhabitants and attractive to home seekers generally. Good roads and artesian wells that furnish good water will do the rest. We are on the right line. We are on the eve of a development that in a few years will be a revelation to us and a blessing to posterity as well as to us while we are enjoying the achievements which are to mark our enterprise and progress. If we could get the ear of every man in this splendid region, with its incomparable climate and unsurpassable lands, we would trumpet to them the appeal to stand for scientific drainage and good roads construction, first, last and all the time. If we have neglected our opportunities, let us turn over a new leaf and make up for lost time.

We are thankful the election is over.

Senator Rayner, of Maryland, has a head full of Democratic sense.

Everybody in Wilmington should be thankful that they are in Wilmington.

The Democratic "animule" will show its horse sense by saying "neigh" to some propositions that have been propounded as Democratic.

A dispatch from Washington says while Colonel Roosevelt was there a few days ago he "took dinner with kindred spirits." If they had "a quiet time" it probably was because they were "too full for utterance." It happens sometime that a man has a powerful good excuse for not "speaking out."

CURRENT COMMENT.

Good county roads are worth as much to a town as railroads and sometimes a good deal more.—Durham Herald.

It is rumored in some circles that when Colonel Roosevelt gets his bandages off he will proceed to Egypt and kick the stuffing out of the Sphinx for tipping him off wrong to the effect that he was it with a cap 1.—New York Evening Telegram.

The Bennettsville Advocate announces on the authority of Ira W. Williams that Archie T. Odom, of Brightsville, Marlboro county, will probaly make the second best record in raising corn on a single acre in South Carolina this year. The number of bushels harvested by the Marlboro lad is not mentioned, but to rank second to Jerry Moore he must have produced an extraordinary crop.—Columbia State.

Here comes Colonel Thomas W. Clawson, of the Wilmington Star, right into our own baliwick, telling us something about sorghum and its bi-product that we didn't know. We have fed cane to the mill and have seen the juice spurt from the iron cylinders, we have seen the juice poured into the big kettle and brought to a boil." With a long handled ladle we have scooped off the scum and cast it away, but we have never seen it thrown into a barrel to convert itself into mockum. One consolation we have is that Brother Ashcraft of the Monroe Enquirer, who is fairly surrounded by sugar cane, had never heard of it, either. Mockum must be a drink fit for the swine. The praise which Colonel Clawson bestows upon North Carolina sorghum, is well placed and there are abundant evidences this Fall of the revival of this industry. For some years past there has been a sorghum works on Ninety-first street, Charlotte, near Sugar Creek church, and there are more cane mills in operation in Mecklenburg county this season than there has been known in years. If we were given our choice for supper between a hotel lay-out and a set-down to sorghum, hot biscuit, fresh butter and a pint of unstripped milk, we would take the latter—for once, anyhow.—Charlotte Chronicle.

If you want to learn things, go east—to Eastern Carolina. The Wilmington Star bobs up with the announcement that one of the bi-products of home-made sorghum is mockum, a kind of liquor that will make "drunk come" instanter. Necessity is the mother of invention. Liquor, presumably is "scarce" down east and the discovery of this new substitute is no doubt regarded as a blessing in disguise. However, they do say that when a man tanks up with mockum no one can tell when he is going to get sober. However, this should commend it, for staying drunk will be cheaper, though there is such a thing as not being able to have more than one drunk, for mockum might put out the fellow's light. The astonishing thing about the discovery is that Wade Harris, the Charlotte Chronicle scribe, never heard of it, although "endurin' of the war he fed cane mills, skimmed the sorghum and kept up the fires all night long on occasion. Did Col. Harris ever hear of "cane liquor" during the war—did he ever taste it or try it out? There used to be a saying that one drink of it would make a man strike his grandmother. This new name is probably the same thing as cane liquor. Liquor was also made of persimmons during the war and it was a hummer, too, making a man drunk and keeping him drunk, while his mouth for a month was all puckered up from the taste of persimmons.—Greensboro Record.

We are told in the Word that an honest man is the noblest work of God. There was buried in Wilmington on Monday a man who measured up to this highest standard of the Bible. Mr. B. G. Worth, for more than half a century a leading merchant of our chief seaport, engaged in business with partners in New York after the war. While the partnership lasted, he returned to Wilmington and had no active part in the business when it turned out disastrously. But the firm failed and could only pay its creditors a portion of their debt. When the firm failed the creditors accepted what it had in full settlement of all obligations. In law, Mr. Worth was not liable for a penny, after he had surrendered his property, but he notified the creditors that he regarded every dollar of the obligation as binding upon him and he would devote his life to paying every cent. Long life was given, and a large measure of prosperity. He lived to pay every dollar of an obligation self-imposed, and which was not legally binding upon him. Other men grew rich about him, and he would have been a very wealthy man if he had acted as ninety-nine men out of a hundred had acted. Instead of a big fortune, he leaves to his children something far more valuable—the heritage of a good name, that is above riches. His name became the synonym of honesty, truth, patriotism, and he was esteemed in his city and State as a business man who raised the standard of his calling, and his life will be held up as an example to the youth of the State he loved so devotedly. It is such men whose lives are the best sermon on the truth and power of the religion they profess.—Raleigh News and Observer.

THANKSGIVING DAY IN CITY

Usual Observance in Wilmington Today.—Services at the Churches.—Football and Golfing Events. —Other Notes.

The usual observance of Thanksgiving Day in Wilmington will take place today. The weather indications are very favorable and unless the unexpected happens the observance will be fully up to the standards of former years. There will be a general recession from business by most people for at least a part of the day, there will be appropriate services in nearly all the churches while many will spend the occasion in the enjoyment of their homes and firesides with the "dispersed abroad," who will be with them for the holiday.

Thanksgiving in its strictest interpretation is an annual festival of thanksgiving for the mercies of the closing year. Practically it is a National harvest festival and is fixed by proclamation of the President and Governors of States, ranking everywhere as a legal holiday. In 1789 the Episcopal Church formally recognized the civil government's authority to appoint such a feast and in 1888 the Roman Catholic church also decided to honor a festival which had long been nearly universally observed, though nowhere with such zest as in the New England States, where it ranks as the great annual family festival, taking the place which in England is accorded to Christmas. The earliest harvest thanksgiving in America was kept by the Pilgrim Fathers at Plymouth in 1621. Congress authorized days of thanksgiving annually during the Revolution and in 1784 for the return of peace—as did President Madison in 1815—Washington appointed such a day in 1789 after the adoption of the constitution, and in 1795 for the general benefits and welfare of the Nation. Since 1863 the presidents have always issued proclamations appointing th last Thursday in November as Thanksgiving Day.

Today in Wilmington all the county, municipal, State and United States offices will be closed, holiday will be given in the general offices of the Atlantic Coast Line and in the public schools. While many people will remain in the city for the attractions offered here, a great many others will leave for forest and streams to enjoy a day's outing, others have already gone to Norfolk or Richmond for one or the other of the big football games scheduled for this afternoon and many others will take the early trains today to spend a while out of the city.

The chief attraction in the city today is the football game at League Park between Raleigh and Wilmington for the High School championship of the State. Both teams are in fine fettle and a great game is expected. Another feature of interest for many Wilmington people will be the annual handicap golf tournament for gentlemen on the links of the Cape Fear Golf Club. Play will begin upon the arrival of the 10 A. M., car, and a part of the tourney will be completed before and a part after the annual Thanksgiving luncheon, which will include the proverbial North Carolina oyster roast.

The theatres are presenting extra big offerings for the day. The Academy has as a big Thanksgiving offering John W. Vogel's minstrels, while the Bijou, the Crystal and Joyland theatres have special Thanksgiving bills for their patrons, there being three performances at the Crystal tonight for hte holiday throngs.

The patriotic order of the Jr. O. U. A. M., is not unmindful of the day and under a special Thanksgiving proclamation of State Councilor Luther T. Hartsell, Jeff Davis Councill will attend divine services next Sunday evening at Fifth Street M. E. Church when there will be a special sermon by the pastor, Rev. K. D. Holmes. Secretary John E. Wood has issued a call for a meeting of all members of the order to assemble at their council room at 7 o'clock Sunday evening for the purpose of attending the exercises in a body.

In the Churches.

Special Thanksgiving services are announced for the various city churches today as follows:

St. John's Church, Third and Red Cross streets, Rev. Wm. E. Cox, rector. Appropriate Thanksgiving services at 11 A. M. The offering, as usual on Thanksgiving Day, will be for the Thompson Orphanage at Charlotte. A letter written by the Superintendent of the Orphanage has been mailed to every family in the parish, and a special envelope was sent with that letter so that those who could not attend the Thanksgiving service could nevertheless send their contribution for the orphans. Their appeal this year is a more than usually a touching one.

The usual Thanksgiving service will be held at St. James' Church this morning at 11 o'clock. The rector will preach the sermon. At this service offerings of provisions for the needy of the city will be made, and afterwards distributed by the Brotherhood. The plate offering will be for the support of the Thompson Orphanage. At night, at 8 o'clock, a lecture will be given by Dr. Fallon, assistant of Dr. Grenfell, of the Labrador Mission, in the Parish House of the church. It is earnestly hoped that this lecture may be generally attended, not only by the regular congregation of the church, but by all who are interested in, or who wish to learn more, of the remarkable work which is being done by Dr. Grenfell and his assistants, about which so much has been written during recent years. An offering will be taken to defray Dr. Fallon's expenses on his visit here.

This morning there will be a special service of Thanksgiving in St. Paul's Lutheran Church with a sermon by the pastor on "Three Biblical Thoughts for This Day." The service will be in English as usual and will begin at 11 o'clock. Music and decorations will be of a nature appropriate to the day. The offering at this service is a special one. The congregation will remember the orphans of the church on this day, when plenty and comfort reigns in almost every home.

Special Thanksgiving services will be held at 11 o'clock this morning at Bladen street M. E. Church, conducted by the pastor, Rev. W. L. Rexford. The offering will be devoted to the church assessment for widows and orphans. The public is cordially invited and is assured a most enjoyable service.

There will be special Thanksgiving services at 11 A. M. today with sermon by the pastor, Rev. A. D. McClure, D. D. The offering will be for the Barium Springs Orphanage and the public is cordially invited.

Special Thanksgiving services were conducted at Brooklyn Baptist Church last evening with a special and strong sermon by the Rev. R. E. Peele, of Burgaw. The service was well attended and an offering was made for the orphanage.

At the First Presbyterian Church, special Thanksgiving services will be conducted at 11 o'clock this morning by the pastor, Rev. J. M. Wells, D. D. There will be an offering for the Barium Springs Orphanage.

At Immanuel Presbyterian Church at 7:30 o'clock tonight Rev. J. M. Wells, D. D., will preach the sermon. There will be a special song service and an offering for the Barium Springs Orphanage. Rev. J. S. Crowley, the pastor, cordially invites all to attend the service.

The Young Mens' Christian Association will be closed during the day and members will go for a 'hiking party" in the morning to the County Home and will hold a brief religious service for the inmates there during the day.

The W. C. T. U. has arranged for a splendid beneficence in gifts for the poor and unfortunate of the city and for the inmates of the County Home. Donations have been sent to Mrs. W. B. Cooper, No. 207 North Fifth street, and these will be sent out today.

At 11 o'clock this morning there will be a special service of Thanksgiving with sermon by the pastor, Rev. T. A. Smoot. There will be a special offering for the Methodist orphanage at Raleigh. This afternoon in the ladies' parlor of the church the members of the Home Missionary Society will be in attendance to receive gifts for the poor of the city.

Fifth Street M. E. Church: Special Thanksgiving services tonight at 8 o'clock with services by the pastor, Rev. K. D. Holmes. A cordial invitation is extended to the public.

The special Thanksgiving services at Trinity M. E. Church was held last evening at 8 o'clock with sermon by Rev. E. R. Welch, the pastor .The Junior League of Trinity packed a barrel for the orphanage at Raleigh after the service.

The service of Thanksgiving Day at the Church of the Good Shepherd, Sixth and Queen streets, will be held at 10 o'clock this morning with sermon by the rector, Rev. T. P. Noe. The children will bring fruits and other good things for the poor at this service and a special offering will be received for the Thompson Orphanage at Charlotte.

Regular Thanksgiving Day services will be conducted at 11 o'clock this morning at St. Paul's Episcopal Church, Rev. A. W. Seabrease, rector. A special offering will be received for the Thompson Orphanage.

St. Matthews' English Lutheran Church will have its special Thanksgiving Day services on next Sunday with sermon appropriate to the occasion by Rev. Harold E. Beatty, the pastor.

The special Thanksgiving services at the First Baptist Church were held last evening at the church and were of more than the ordinary interest. A special musical programme had been arranged and there were short readings by several of the congregation. At the close of the service, a special offering was received for the poor of the city.

The annual Thanksgiving dinner at the Seamen's Home will be given this evening at 6 o'clock by the Society. All seamen and rivermen are cordially invited.

DAUGHTERS OF REBEKAH.

Will Give Enjoyable Entertainment in I. O. O. F. Hall Tonight.

Local members of the I. O. O. F. have received invtations reading as follows:

Entertainment
Given under the auspices of the Daughters of Rebekah
Thank Offering
Proceeds go to furnishing infirmary at our home in Goldsboro, N. C.
Would you thank the Gracious Giver,
For the blessings of the year?
Then fill the tiny bag we hand you,
Take the kindly thought we send you,
Do you find your pocket bare,
Not a cent to give or share?
Wait! You still may do your part;
Come with thankful, happy heart,
Gladly, though with empty hand,
God will see and understand.
At Odd Fellow's Hall
Cor. Third and Princess streets.
Thursday evening, November 24th, 1910, at 8:30 o'clock.

All friends of orphans are cordially invited to attend the event, which promises to be of a most pleasing nature.

TWO SICKLY CHILDREN

Made Well by Vinol—Letters From Grateful Mothers.

From New Haven, Conn.—"My little girl ever since her birth was frail and sickly and nothing seemed to do her any good, until we tried your cod liver and iron tonic, Vinol. As soon as she commenced to take it, I noticed an improvement in her health and appearance. She has now taken three bottles of Vinol and from the good it has done her I can say it will do all you claim for it In building up and strengthening frail and delicate children." (Name furnished on request.)

Another mother of Chicago, Ill., writes: 'My little girl was thin, rundown, pale and without any appetite. Vinol gave her a good appetite—she has rosy cheeks and has gained rapidly in flesh and strength.

"I cannot say too much in praise of Vinol for delicate, ailing children."

We ask every mother of a frail, sickly or ailing child in this vicinity to try Vinol on our agreement to return their money if it does not do all we claim. Robert R. Bellamy, Druggist, Wilmington, N. C.

WILMINGTON AND RALEIGH

High School Teams Will Contest for Football Honors at League Park This Afternoon—Great Game is Expected.

To determine the championship among the High School football teams of the State, the Wilmington and Raleigh High School elevens will meet on the gridiron at League Park this afternoon. Both teams are in fine trim and a great game is expected. It goes without saying that both teams will put forth their best effort, as the result of the contest will decide the championship of the State, therefore the game is expected to be the most exciting of the season.

The management of the local team expects a large crowd, owing to the fact that this is a holiday and there being no other special events during the afternoon. The games so far this season have not been very extensively patronized and the lovers of the game who did not witness the contests have missed some good games. The game this afternoon, however, promises to be the best of the season. While the local team is considerably lighter than the Raleigh aggregation, the Wilmington boys have confidence in their ability to capture the honors. They will not trust to luck, but will put forth a tremendous effort and if they lose it will not be their fault—it will be due to the fact that the visitors have the best and heaviest team.

The game will be called at 3:30 o'clock and the admission will be 25 cents for adults and 15 cents for children. The Tidewater Power Company will provide a convenient schedule, cars leaving Front and Princess streets as follows: 2, 2:30, 2:45, 3, 3:15 and 3:30 P. M. The management announces that no tickets will be accepted at the gate unless stamped "Thanksgiving Day."

The Raleigh boys arrived in the city last evening and are being entertained by the members of the local team. The visitors come with the expectation of capturing the game and will make it interesting for the locals.

The line-up of the Wilmington team will be as follows: Center, Wells, J.; right guard, Penny, E.; left guard, McKoy, H.; right tackle, Burnett, C.; left tackle, Meyers, F.; right end, Merriman, L.; left end, Taylor, C.; quarterback, Parsley, C.; right halfback, Burnett, R. (captain); left halfback, Hicks, G.; fullback, Boone, L. Raleigh: Center, Champion; right guard, Coke; left guard, Denmark; right tackle, Denton; left tackle, Curtis; right end, Woolsott; left end, Uzzle; quarterback, Brown, (captain), right halfback, Faucett; left halfback, Riddick; fullback, Harris, Pete.

L'ARISO GERMAN CLUB.

Handsome Invitation to Series of Dances This Season.

Acting for the governing board, Mr. Meares Harriss, the secretary, has issued handsomely engraved invitations to the dances to be given by L'Arioso German Club during the present season. The invitations read as follows:

L'Arioso German Club
of germans to be given the evening of the fourth Wednesday in each month
Season 1910-1911.

Patroneses—Mrs. Clayton Giles, Mrs. P. L. Bridgers, Mrs. John D. Bellamy, Mrs. J. V. Grainger, Mrs. Pembroke Jones, Mrs. G. W. Kidder, Mrs. E. W. VanC. Lucas, Mrs. J. K. Wise, Mrs. Robert N. Northrop, Mrs. Hugh MacRae, Mrs. Allan Nichols, Mrs. George Rountree, Mrs. G. Herbert Smith, Mrs. G. G. Thomas, Mrs. Edward P. Bellamy.

President—Thos. H. Wright.
Vice-President—Edw. P. Bailey.
Secretary and Treasurer—Meares Hariss.
Leader—R. E. Calder.
Governing Board—Thos. H. Wright, Edward P. Bailey, H. M. Chase, Graham Kenan, Van Rensselaer C. King, J. Walter Williamson, Meares Harriss.

EXERCISES AT HEMINWAY.

Thanksgiving Donations Were Received Yesterday Morning.

Interesting Thanksgiving exercises were held yesterday morning at Heminway School. Appropriate short talks were made by the Rev. Dr. A. D. McClure, pastor of St. Andrew's Presbyterian Church, and Rev. W. A. Snyder, pastor of St. Paul's Evangelical Lutheran Church. Dr. McClure is an officer of the Associated Charities and in his remarks spoke of the preparations being made by the organization to provide Thanksgiving dinner for the poor of the city. There were a number of recitations by pupils of the school, after which donations were received for the poor and they were very liberal indeed. Two wagon loads of provisions were turned over by the school yesterday afternoon to the Associated Charities for distribution among the deserving poor.

ANALYSIS OF CITY WATER.

Very Slight Sediment But No Pollution—Samples From Mains.

Supt. R. C. Cantwell, of the Water and Sewerage Commission, is mailing to those interested the latest report of an analysis of the city water from the mains by the State Chemist at Raleigh. The analysis shows a very slight sediment but the absence of color and odor by all tests with alkalinity, in terms of calcium carbonate 1.2, chlorine 7, nitrogen as nitrates 0.02, nitrogen as nitrites 0, free ammonia .020, albuminoid ammonia .112, temporary hardness 1.2, total number of bacteria per c.c., 17, with no colon baccili in 1 c.c. or in 10 c.c. The endorsement is made "No pollution." The original of the analysis is on file in the office of the Water and Sewerage Commission for the inspection of the public.

If you are disgusted with other fuels, try Gas Coke. Phone 28.

A story of the "Royal Northwest Mounted Police," Bijou today. **

GOVERNMENT BOATMEN STRIKE

Sixteen Members of Crew of Suction Dredge Comstock Leave Posts Upon Reinstatement of Objectionable Cook.

Upon the reinstatement of Cook W. A. Grissom, against whom they had filed charges which were not sustained by the War Department, sixteen members of the crew of 41 men employed on the government dredge Comstock, recently sent here from Galveston, Texas, struck yesterday and came up to the city on the steamer Wilmington to receive their pay checks from the United States Engineer's office, after which they will leave today for their former homes in Galveston and New York.

The Comstock is engaged on the lower Cape Fear river dredging near Southport and the trouble between the men is said to have been of several weeks' duration. For some time there has been complaint that the cost of subsistence on the dredge was too high and the steward on board was counselled to look into the cause. This brought on differences between Mr. Grissom, who is a native of Southport, and the men, who are said to be largely non-residents and of Norwegian descent. The men made formal charges against the cook and these were investigated, with the result that while some of the contentions of the men were sustained, others were not, the cook, who had been suspended, being reinstated. The men, or at least 16 of them, decided to quit the service and they did so, reaching the city yesterday afternoon with bag and baggage and proceeding at once to the United States Engineer's office for their pay. Assistant Engineer R. C. Merritt, of the office, endeavored to reason with the men, but finding conciliation impossible, he informed them that they would be paid off today and this was satisfactory. Assistant Engineer Merritt stated that the strike would in no way interfere with the operation of the dredge, which will be laid up today for the holiday anyway. None of the men who struck were above the grade of Acting Third Mate, so it is stated from the Engineer's office.

REAL ESTATE TRANSFERS.

Old Star Office Building Changes Hands—Other Deeds Filed.

By deed filed for record at the Court House yesterday, Maj. Wm. H. Bernard transfers to Marshall L. Starkey, for $8,500, the valuable property on Princess street, 156 1-4 feet west of Front street, formerly occupied by the Morning Star newspaper and job office. The property fronts 58 1-4 feet on Princess and runs back into the block 66 feet. Mr. Starkey has already commissioned Architect H. E. Bonitb to draw plans for remodelling the building so as to contain stores on the ground floor with offices and apartments on the second and third floors.

Other deeds filed for record yesterday were as follows:

W. C. Armstrong and wife to D. L. T. Capps, for $4,100, residence property on west side of Fifth, 198 feet south of Nun street, 66x165 feet in size.

People's Savings Bank to J. D. Brantly and wife, for $100 and other considerations, northwest corner 10th and Queen streets, 82 1-2x100 feet in size.

American Union Association to Amelia Mills, for $18 and other considerations, property on east side of Sixth, 198 feet south of Market street, 33x77 1-2 feet in size.

Saves an Iowa Man's Life.

The very grave seemed to yawn before Robert Madsen, of West Burlington, Iowa, when, after seven weeks in the hospital, four of the best physicians gave him up. Then was shown the marvelous curative power of Electric Bitters. For, after eight months of frightful suffering from liver trouble and yellow jaundice, getting no help from other remedies or doctors, five bottles of this matchless medicine completely cured him. It's positively guaranteed for stomach, liver or kidney troubles and never disappoints. Only 50c at Robert R. Bellamy's.

IF WOMEN ONLY KNEW

What a Heap of Happiness It Would Bring to Wilmington Homes.

Hard to do housework with an aching back.

Brings you hours of misery at leisure or at work.

If women only knew the cause—that

Backache pains come from sick kidneys,

'Twould save much needless woe.

Doan's Kidney Pills cure sick kidneys,

Wilmington people endorse this:

Miss Mattie Hodges, 609 S. Fifth St., Wilmington, N. C., says: "Since using Doan's Kidney Pills I have felt better in every way and am pleased to add my testimonial to the many already given in favor of this remedy. I had kidney trouble for years. My back ached most of the time and when I stooped or lifetd, sharp pains caught me across my loins. I had but little strength or energy and was also bothered by a kidney weakness. I used one box of Doan's Kidney Pills, procured from Robert R. Bellamy's drug store and they disposed of the backache, strengthened my kidneys and gave me ambition and energy."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

THE YOUNGEST STATE SENATOR.

Hon. Rivers D. Johnson With Duplin Delegation Convention.

The Star had a pleasant visit yesterday from State Senator-elect Rivers D. Johnson, of Warsaw. Mr. Johnson is just 25 years of age and is the youngest of the State Senators chosen at the recent election. He is a lawyer and a Democrat and will ably represent the Tenth Senatorial District composed of Duplin and Pender counties.

The Tenth District will have a good Senator in the young man who has been honored by the Democrats of Duplin and Pender. He is a genteman of earnest purpose and is alive to the public questions and progressive movements of the day. He came to Wilmington to attend the convention of the North Carolina Drainage Association and was one of an intensely interested delegation of twenty-five delegates from his county. Duplin sent down some of her best citizens and they are thoroughly interested in the drainage question.

Duplin expects to be heard from not only on the matter of drainage, but also on the good roads movement. A meeting of the citizens of Duplin has been called at Kenansville on the first Monday in January for the purpose of organizing a County Good Roads Association. Dr. Joseph Hyde Pratt, State Geologist, and Editor H. B. Varner, of the "Southern Good Roads" magazine, will be there and help the Duplin people whoop up good roads for all they are worth.

THANKSGIVING AT UNION.

Special Exercises at Public School Yesterday.—The Students.

Special Thanksgiving exercises were observed yesterday at the Union School by the pupils of that institution. The exercises opened with a Thanksgiving song and then came thirty "Little Lasses from Spotless Town," who recited verses and deposited their bundles. Next were thirty "Small Millers," bearing sacks of flour, meal, hominy, etc., and farmers bearing large vegetable baskets. Thirty "Small Cooks" then marched in with loaves of bread, reciting little poems and telling how the bread was made. The "Cold Storage" boys next came in with meat, eggs, etc. Fifty small boys of the first grade impersonated the "United States Infantry," with caps, flags and horns, followed by "Primary Express Wagons," laden with good things. "The Helping Hands" were next and they recited a little poem and deposited their burdens. Last, but not least, came marching in thirty "Red Cross Nurses" bearing trays of delicious things for the sick. The entertainment was highly creditable.

LECTURE LAST NIGHT.

Dr. Fallon Heard With Interest at First Presbyterian Church.

Dr. Louis F. Fallon, of Wayne, Pa., who for the past two Summers has been assisting Dr. Grenfell in his great mission work on the coast of Labrador, gave an interesting and instructive illustrated lecture at the Memorial Hall of the First Presbyterian Church last night. The audience evidenced great interest in the work being carried on by Dr. Grenfell as narrated by D. Fallon. In the Parish House of St. James' Episcopal church at 8 o'clock this evening Dr. Fallon will deliver another lecture. The public is cordially invited to attend.

NEWS OF THE SHIPPING.

Another Steamer with Cotton for France.—One Clears Light.

After being delayed for about two days in securing a full crew, the British steamer, Winnie, Capt. Shotten, cleared yesterday for Havre, France, with cargo of 8,541 bales of cotton, valued at $640,000. This is the third cargo of the staple from the port of Wilmington this season for France. The vessel and cargo are by Messrs Alexander Sprunt & Son.

The British steamer Frederike, Capt. Ainsley, cleared light yesterday for Charleston, S. C., after discharging cargo of fertilizer material at this port. The vessel is by Heide & Co.

His Death Regretted Here.

Friends and relatives in this city yesterday morning received with painful sorrow the news of the death of Mr. James Cooper Stedman, which occurred in St. Luke's hospital, in Fayetteville, after a lingering illness. Mr. Stedman formerly resided in this city and is well remembered by many Wilmington friends, especially those of the older generation. The news of the death is carried elsewhere in today's paper in a special from Fayetteville.

Goes With N. & S. C. Railroad.

Mr. Herbert E. Goodwyn, a popular member of the large railroad colony in Wilmington, formerly chief clerk in the Seaboard offices in this city, but lately with the Atlantic Coast Line, leaves tomorrow morning for Hamlet, where he will be with the North and South Carolina Railroad, now building to Cheraw, S. C. He carried with him to his new home the very best wishes of a host of friends.

Alcohol in Medicines.

Alcohol is the best known preservative of medical compounds, and the average proprietary medicine contains from 1 per cent. to 22 per cent. which is the smallest possible amount to preserve the ingredients, while the average doctor's prescription contains from 25 per cent. to 50 per cent.

Such standard preparations as Lydia E. Pinkham's Vegetable Compound contain but 18 per cent., and they even put the Compound up in tablet form, which the over-scrupulous woman, who objects to alcohol in any degree, may use.

His Brother Dead.

Mr. Frank Brown, of this city, left yesterday morning in response to a telegram conveying to him the intelligence of the death of his brother, Mr. Fred Brown, which occurred Tuesday night at his home in Boston. The funeral and interment will take place ther. Mr. Brown was expecting his brother here on a Thanksgiving visit to him when the telegram came, announcing the death. The deceased had been in poor health for some time, but his death was by no means expected.

Mite Box Opening.

The mite box opening of Grace Church Brigade will take place in the lecture room of the church Friday at 4 o'clock in the afternoon. All members are requested to be in attendance at this time.

MEANS MILLIONS TO ROADS.

Engineering Expert Testifies Before Commerce Commission.

Washington, Nov. 23.—A saving of $300,000,000 annually in railroad operating expenses in this country might be accomplished by the adoption of scientific methods of management according to Harrington Emerson, a mechanic engineer expert of New York, who testified before the Interstate Commerce Commission today. The estimate, which is identical with the amount named by Senator Aldrich, of Rhode Island, as a possible economy in the administration of the Federal government on business principles, was made in the course of the hearing on the proposed freight rate advances in official classification territory.

Today's session of the commission consisted mostly of direction of scientific management by expert witnesses. This line of testimony was closed late in the afternoon when the commission adjourned until Friday.

Attorney Brandeis, for the Atlantic seaboard shippers, in summing up the scientific management testimony of his witnesses, re-iterated his request that the commission conduct an independent investigation if it believes that the railroads have not introduced such scientific methods, and he believes that he has produced evidence to show that they had not. He said the railroads use of the present wage increases as an excuse for rate increases pointed to an "increase of the burdens of the American public."

He called attention to what he described a prediction by heads of great trunk lines that the pending increases were only an earnest of what is to come that the public is to expect and become accustomed to a progressive rise in rates throughout the country.

Mr. Brandeis assumed the burden of proof was on the railroads to show whether they have put into operation economies which he did not believe existed and that these economies should first be practiced before resorting to advances.

NOTED BLOCKADER GUILTY.

Jim Staley Convicted at Raleigh of Murderous Assault.

(Special Star Telegram.)

Raleigh, N. C., Nov. 23.—A verdict of guilty was returned tonight by a Federal Court jury against Jim Staley, a negro blockader, for well nigh mortally wounding Revenue Officer H. C. Reece, of Moore county, in March, 1908. Reece and a number of other revenue officers were making a raid. The shooting was from ambush. Staley fled and was only captured two months ago in Davidson county, where he had lately married under the assumed name of Will Melborn.

A POETICAL INQUIRY.

In a Southern city
Two policemen on one beat
Two policemen with big feet,
Strolled down Castle street
To see what obstructions
they could meet.

Two feed boxes they did find
Very near to Castle street.
Mr. Policeman were you obstructed
Or specially instructed
In your migration not to see
No other violators except
Fales and me? —E. E. RUSS.

RAILROAD EARNINGS.

Announced by Commerce Commission—Mileage Operated.

Washington, Nov. 23.—The Inter-State Commerce Commission today announced that the net revenues of the steam roads of the United States during last August aggregated $90,028,751, or $377.49 per mile of line against $90,998,283, or $380.10 per mile of line. The deduction of one-twelfth annual taxes left the operating income $81,163,009, or $340.32, as against $83,000,690, or $346.70 per mile of line in 1909.

The mileage operated on which this summary of the monthly reports of the railroads is based, was 238,493, as against 239,404 miles last year.

The detailed figures show that for August 1910 the total operating revenues were $254,005,972 and the total operating expenses $164,488,899, the total net revenue already given including outside operations which yielded a net revenue of little over half a million dollars.

SUPREME COURT OPINIONS.

Decisions Handed Down in Six Appeals Yesterday.

(Special Star Telegram.)

Raleigh, Nov. 23.—There were opinions delivered in ten appeals by the North Carolina Supreme Court this weekly delivery day. The list follows: Myers vs. Pelly, et al Lee, no error; Rhodes vs. Love, Lincoln, affirmed; Gray vs. Ritter Lumber Co., McDowell, appeal dismissed by consent; Haiston vs. Baptist Church, Forsythe, affirmed; Union Guano Co. vs. White, et al, Mecklenburg, affirmed; Durkee vs. Miller, Mecklenburg, affirmed; Good Samaritarian Hospital vs. Chappelle, Mecklenburg, affirmed; Cline vs. Southern Railway, Cleveland, affirmed.

SOCIAL and PERSONAL

Brief Mention, News of Societies, Meetings, etc

Mrs. John W. Daniel is visiting relatives and friends in Atlanta and other points in Georgia.

* * *

Mrs. John D. Horton, of Zebulon, N. C., is the guest of Mr. and Mrs. C. B. Newcombe, No. 507 Princess street.

* * *

Miss Eloise Jackson is at home from Peace Institute, Raleigh, to spend the holidays with her parents, Mr. and Mrs. J. W. Jackson.

* * *

Mrs. J. E. Womack, of Augusta, Ga., is visiting her parents, Mr. and Mrs. J. W. Jackson, and will remain with them until the new year.

* * *

Many friends will be delighted to know that the condition of Dr. N. A. Culbreth has improved to such extent that he was able to leave yesterday with his parents, Dr. and Mrs. N. M. Culbreth, for Raleigh, where he will spend a week or ten days recuperating. He was also accompanied by his wife, who has been spending some time in New York city.

* * *

Interest of local golfers will center today in the annual Thanksgiving Day handicap match for men on the links of the Cape Fear Golf Club, just east of the city. It will be for 27 holes, 18 to be played before and nine after luncheon. The play will begin upon the arrival of the 10 o'clock car in the morning. An oyster roast will be served at 2 o'clock and this will be a decidedly pleasing feature of the day. All male members of the club are invited to take part in the play.

* * *

MARRIAGE AT SCOTT'S HILL LAST NIGHT.

Many friends will be interested in the announcement of the marriage of Miss Roena Lee Canady, daughter of Mr. and Mrs. W. B. Canady, of Scott's Hill, and Mr. G. H. Woodville, a prominent young business man of that community, which was celebrated at the home of the bride's parents, at 8 o'clock last night, the ceremony being performed by Rev. Mr. Rogers, the bride's pastor. It was a very quiet home affair and the ceremony was witnessed by only a few relatives and intimate friends. Mr. and Mrs. Woodville will reside at Scott's Hill, where they are very popular in a wide circle of friends, who extend felicitations and best wishes.

* * *

PRETTY HOME WEDDING YESTERDAY MORNING.

In the presence of a number of relatives and friends Miss Maria Louise Meier, the attractive daughter of Mr. and Mrs. Frank Meier, and Mr. Frederick Mercer Gallagher, a well known young man of this city, were happily united in marriage at 7:30 o'clock yesterday morning. The ceremony was impressively performed at the home of the bride's parents, No. 912 Princess street, by Rev. E. R. Welch, pastor of Trinity Methodist Church. The home was attractively decorated, the color scheme of green and white being effectively carried out.

The bridal party entered the parlor to the strains of the wedding march skilfully played by Miss Eugenia King. The bride was attended as maid of honor by her sister, Miss Carrie Virginia Meier, who wore a coat suit of steel blue. The bride was handsomely attired in a grey traveling suit with hat and gloves to match. Mr. R. H. Gieschen was best man.

Immediately following the ceremony Mr. and Mrs. Gallagher drove to the union station, whence they departed for a bridal tour of ten days to points of interest in the North. Upon their return they will make their home at No. 812 Princess street.

The groom, who recently moved here from Washington, N. C., is very popular with a wide circle of friends in this city. He holds a position in the general offices of the Coast Line. His bride is a beautiful and attractive young lady and has a large number of friends in this city and elsewhere. The popularity of the couple was attested by the many handsome and valuable wedding presents received, among the number being a set of spoons given by the groom's grandmother, which have been handed down for five generations.

* * *

PRETTY HOME WEDDING YESTERDAY AFTERNOON.

Yesterday afternoon at six o'clock one of the prettiest home weddings of the season took place, when Miss Maria Burgwin Mafflitt, daughter of Mrs. Sarah Mafflitt, became the bride of Mr. John J. Parker, of Monroe, N. C. The ceremony was impressively performed by Rev. W. H. Milton, D. D., rector of Saint Jame's Church, at the home of the bride's mother, 323 South Fourth street, which was beautifully decorated with bamboo, white chrysanthemums and candles. The wedding march was rendered by Miss Julia Post, to the strains of which the bridal party entered the parlor where the ceremony was performed.

The bride was very becomingly gowned in white messaline trimmed with pearls, her veil caught up with orange blossoms. She carried a shower bouquet of Bride's roses and lilies of the valley. The maid of honor, Miss Sarah Mafflitt, a sister of the bride, wore a gown of pink and carried pink carnations. The bridesmaid, Miss Carolina Parker, sister of the groom, wore white messaline trimmed with white Chiffon, and carried pink carnations. Mr. Lesley Parker, a cousin of the groom, was best man, and the groomsman was Mr. C. F. Dexter, of Hampton, Va.

Following the ceremony a reception was given the bridal party at the home of the bride's mother and was a delightful event. Mr. and Mrs. Parker left on the evening train for a bridal tour to points in the North and upon their return will be at home in Monroe.

The bride is a charming and accomplished young lady of this city and is much admired in a wide circle of friends, who regret that she is to make her home elsewhere, but indulge the hope that she will return to Wilmington frequently on visits. The groom is a prominent member of the Monroe bar and has an exceedingly bright future in his profession. He was the Republican nominee for Congress in his district in the last election. He is well known throughout the State and his many friends will wish for him a long and happy life.

SALOON KEEPER RAN AMUCK.

Killed One and Wounded Two—Enraged by Conviction.

New Castle, Colo., Nov. 23.—William Griffith, a saloon keeper, enraged at his conviction for assault, ran amuck on the streets here this evening, shot and killed one man and badly wounded two others. He is now barricaded in a room in the Bank block and shooting through the window at every one who approaches.

William Davis, a by-stander, is dead with a bullet in his brain. City Marshal Remmix was wounded in the abdomen. Philip Carpenter, a pioneer of the town, who was passing along the street at the time of the shooting, was shot in the neck, and will die.

Griffith was convicted in the district court at Glenwood Springs yesterday on a charge of assault, the complainant being J. T. Sample. Pending an appeal, Griffith was released on bond. He returned to New Castle and Sample was the first person he saw after alighting from the car. He immediately opened fire on Sample, who fled with Griffith in pursuit. Marshal Remmix tried to intercept the prisoner and was shot down, after which Griffith fired into a crowd of spectators. He then fled to the bank block. The sheriff was summoned from Glenwood and hurried to the scene with a posse.

RIO JANEIRO FIRED UPON.

Report in London That Brazilian Fleet Has Mutinied.

London, Nov. 23.—Reports have been received by business houses that part of the Brazilian fleet has mutinied. A private dispatch received at Barrow tonight says that the crews of Brazilian warships mutinied and fired on the capital. The dispatch gave no further details.

According to a later telegram from Rio Janeiro, all business has been suspended there and the situation is critical. Negotiations between officers ashore and mutinous marines on board one or more of the warships have not yet been concluded.

The Brazilian legation here has received a dispatch that the outbreak was not of a political nature. According to this dispatch the crew of a dreadnought lying in the harbor mutinied against the officers. The government has taken necessary measures to restore order.

Buenos Ayres, Nov. 23.—A dispatch received here from Rio Janeiro says that the crews of several warships of the Brazilian fleet revolted last evening. Their act appears to be merely a case of insubordination, having no political character. A rigorous censorship is being maintained by the Brazilian government, which has prevented the sending out of further information.

22 "MIDDIES" STRICKEN.

Epidemic of Typhoid Fever.—Salt in Sugar by Accident.

Washington, Nov. 23.—Ordinary table salt in the sugar which they used was responsible for the illness of the midshipmen at the Naval Academy at Annapolis, who were supposed to have been the victims of a spiteful plot conceived and executed in the culinary department of the school. Such was the conclusion reached following a chemical analysis of a sample of the sugar made here today in the laboratory of the Surgeon General of the Navy. Officials of the Navy Department are inclined to the belief that the salt found its way into the sugar purely through accident and that there was no plot at all.

There are now 22 cases of typhoid fever at the Academy and four patients are in a serious condition according to reports received today by Surgeon General Stokes. The typhoid epidemic of course has no relation to the contaminated sugar. The surgeon general expects that a few more cases of the fever may develop during the next week as a result of drinking mild drinks supposed to have contained the germ, but he believes that by the end of the current month the period of incubation will be over and consequently all danger will have passed.

ATTELL GETS DECISION.

Ten Rounds of Bloody Fighting with Jimmy Walsh.

Kansas City, M., Nov. 23.—Monte Attell, of San Francisco, tonight was given a decision over Jimmy Walsh, of Boston, after ten rounds of bloody fighting. Attell claims the bantam weight championship of the world by virtue of his victory.

The San Francisco youth won against great odds. Walsh, who refused to weigh in, is said to have weighed 133 pounds. Attell weighed 116, the bantam weight limit. Attell, by clever footwork managed to evade most of Walsh's rushes and to draw the Boston pugilist into clinches. Then Attell would rock his opponent's head with jaw punches and batter his mouth and nose. Attell did little damage with his body blows. There were no knock downs.

Walsh started the fight like a winner, closing Attell's right eye in the first round. He frequently rushed Attell to the ropes and landed rights to the jaw, but they did not appear to harm the Pacific coast fighter.

CONCERNING LUMBER GRADES.

Gulf Coast Exporters Want to Have Uniform System.

New Orleans, Nov. 23.—Gulf coast lumber exporters will undertake an inquiry of wide scope in order to arrive at a uniform system of classification and grades satisfactory to both consignor and consignee.

To make an exhaustive study in this connection, a committee from the Gulf Coast Lumber Exporters' Association will be appointed to go to Europe, it was announced today, following a meeting of the association.

Housewives

Should learn what tempting, delicious desserts can be made if Blue Ribbon Vanilla Extract is used.

LOCAL DOTS.

—Capt. McIntyre recently arrived at Fort Caswell to succeed First Lieut. Sanford, of the Medical Reserve Corps. Capt. McIntyre was ordered to Caswell from San Francisco.

—License was issued yesterday for the marriage of Mr. Geo. H. Woodville, son of Mr. and Mrs. Geo. C. Woodville, to Miss Reena L. Canady, daughter of Mr. and Mrs. W. B. Canady, all of Scott's Hill.

—In the Recorder's court yesterday morning Lizzie McArthur, colored, was fined $5 and costs for drunkenness and disorderly conduct. Dick Gause, colored, was assessed the cost for assault and battery. Today being a legal holiday there will be no session of the court.

—Messrs. W. L. Smith and E. S. Hancock returned yesterday afternoon from Southport, where they attended the Odd Fellows' Convention for the sixth district in session there Tuesday and yesterday. There were about 20 visitors in attendance and the meeting was of a profitable and interesting nature.

PERSONAL PARAGRAPHS.

—William J. Bellamy, Esq., of the local bar, spent yesterday at Southport on professional business.

—Mr. A. F. Bland, of Teachey, N. C., spent yesterday in the city, returning to his home from Southport, N. C.

—Mr. C. P. Parker, of Parkersburg, N. C., returned home yesterday evening after attending the sessions of the State Drainage Association.

—Mr. E. T. Wade, formerly of Wilmington, but now traveling in the Carolinas for commercial lines, has been in the city for a few days.

—Mr. J. H. Mason, the clever traveling representative of the Charlotte Observer, is in the city for a brief business visit and is a guest at The Orton.

—Mr. Marx S. Nathan is in the city to spend Thanksgiving with his parents. He came down from Raleigh, where he is now managing the Academy of Music.

—Mr. A. B. Croom, Jr., of Burgaw, who was one of the prominent East Carolinians here for the drainage convention, left yesterday afternoon on a business trip to Monroe and Charlotte, N. C.

—Speaker E. M. Koonce, of 1911 Session of the General Assembly, arrived in the city last night from Norfolk, where he was called on professional business. He will leave for his home in Onslow today.

—The Star had a pleasant call yesterday from Dr. John M. Faison, Democratic Congressman-elect from the Third North Carolina district, who has been here in attendance upon the drainage convention.

—Mr. J. F. Moore, of Currie, spent yesterday in the city. He came down to attend the drainage convention and to take the boat trip down the river yesterday, but unfortunately arrived a little too late and spent he day on business, returning last evening.

RED CROSS SOCIETY CAR.

Presented by Pullman Company for First Aid to Injured Work.

Washington, Nov. 23.—Covering a wider field than the portable rescue station being put into service by the Bureau of Mines, a car will be put on the road by the American Red Cross Society about December 5th, which will teach first-aid-to-the-injured work to railroad employes, employes of factories, as well as covering other ground, where there is danger from accidents.

While this car, which will be known as "The American Red Cross first-aid car" will cover a somewhat different field than the Bureau of Mines cars, it will do work in the mining districts, and also will be available in case of mine disasters.

The car which now is in Buffalo, N. Y., receiving its equipment, was presented to the American Red Cross Society by the Pullman Car Company, and the railroads, it is said, will make no charge for hauling the portable first-aid school throughout the country.

Dr. M. Whitfield Glasgow, of Birmingham, Ala., will have charge of the car.

CONVICTED AT TAMPA, FLA.

Three Guilty of Conspiracy—Result of Cigar Makers Strike.

Tampa, Fla., Nov. 23.—Jose de La-Campa, Britt Russell and J. F. Bartlum, leading members of the joint advisory board of the Cigar Workers of Tampa, were found guilty of conspiring to prevent cigar workers from returning to work and of "intimidating cigar workers in defiance of law and order." Sentence was not passed as a motion was immediately made for a new trial. The case has been one of the most bitterly contested that has been tried in Tampa in years.

As a result of the finding of the jury tonight the city is unusually excited. The verdict relieves much pent up feeling among the leading business men who have seen the industrial structure erected through years of ceaseless effort crumbling under the devastating influence of strike, which has continued 24 weeks.

STOCK BROKERS ARRESTED.

Alleged Fraud—Work of Postoffice Inspectors.

Cleveland, O., Nov. 23.—Charles A. Sandals and Albert S. Griffin, conducting a stock brokerage business under the firm name of Sandals, Griffin & Co., were arrested by Postoffice Inspectors this afternoon charged with using the mails to defraud.

The two men have been engaged in selling stock in the Sterling Oil Company supposed to own large oil fields in Oklahoma. This stock which was sold principally to farmers in Northern Ohio, was represented, it is charged, as an investment which would return 50 per cent. According to United States District Attorney Day its value is problematic.

Postoffice Inspectors returned yesterday from Oklahoma and recommended the immediate arrest of the brokers. They were released this evening on $5,000 bonds.

"More Than His Duty," Bijou today. **

Theatrical

The Academy is to royally celebrate Thanksgiving. It will offer the merriest and biggest holiday attraction it has ever presented, and it will be for two performences. At matinee to-day and again this evening John W. Vogel's Minstrels will revel at the Academy, presenting a sumptuous production and a high class minstrel performance. This is the first trip South of the noted minstrel manager John W. Vogel, and the tour of his big organization in this section has so far been as great as it has been in the larger cities of the north. The minstrels will be seen on parade today and the superb band will be heard

The Great "KNATZGRR"

at a concert. This afternoon will come the first performance and in order to accommodate the public seats for the matinee are being sold at Plummer's. The prices for the matinee are 25, 50 and 75 cents, the first noted applying only to children under 10 years of age. The night prices run only to $1. Seats for to-night are now also selling at Pummer's and indications point to a big audience.

John W. Vogel's Big City Minstrels will present one of the most novel and pleasing entertainments ever offered the amusement loving public. The program is overflowing with rapid fire fun and genuine surprises; pretty music and dazzling scenic and electrical effects form an important part of the entertainment. The entire mammoth program is everywhere presented in absolute perfection, never curtailed in any detail, a fact that makes this organization still more successful each successive season. The management's motto has been 'Perfection Makes Popularity"

The Crystal Palace.

Especially attractive afternoon performances have been arranged for today, 3:30 and 4:30. Hyatt & LeNore will play their best sketch and include some dancing as well as a pleasing piano solo. The clown act of Mr. Stallings has been the hit of the season, and "Uncle Josh" will have some violin selections. There will be an extra tonight show and because it is unusually long the curtain will rise at 7:30 o'clock, and the performances will continue until 11 o'clock.

At the Bijou Today.

At the Bijou theatre today will be shown "More Than His Duty," a story of the royal Northwest mounted police, and "The Wrong Box," a delightful comedy packed with fun. Both are fine pictures and will doubtless prove exceedingly enjoyable to the holiday crowds expected at the theatre today.

At Joyland.

A big Thanksgiving feature film will be offered at popular Joyland today and the Thanksgiving throngs can find no better way to spend an unoccupied hour than by visiting this little theatre. "The Fairies' Hallowe'en," will be the feature while there will be two other imported films that are sure to please. Change of programme daily.

BIG EVENT AT BELMONT.

Celebrating Silver Abbatial Jubilee of Bishop Leo Haid.

Belmont, N. C., Nov. 2.—The elaborate services attendant upon the Jubilee of Bishop Leo Haid, D. D., O. S. B. Vicar apostolic of North Carolina and Abbot of Belmont Cathedral Abbey, began this afternoon when a large array of rare and costly presents, gifts from admiring friends from all parts of the world were formally presented to the venerable bishop.

The ceremony was presided over by Very Father Felix, Prior of Belmont Cathedral Abbey, who has been long associated with the bishop in his work. Attending the ceremonies are many distinguished prelates and lay members of the Catholic Church.

Tonight a pretty illumination by fireworks of the abbey grounds was made. Tomorrow at the jubilee exercises Bishop Kenovan, of Pittsburg, will preach the jubilee sermon.

At 1 o'clock a banquet will be served in the benedictine monattery.

New York, Nov. 23.—Shelton C. Burr, and his brother Eugene H. Burr, of the firm of Burr Brothers, incorporated, dealers in oil and mining stocks, who were arrested last Monday charged with using the United States mails to defraud were admitted to bail this afternoon in the sum of $10,000 each. Frank C. Tobey, the third member of the firm, arrested in the same Federal raid, has not yet found bail and is still in the tombs.

$100 Reward, $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials

COUNT TOLSTOI BURIED.

Last Tribute of Peasants to the Great Russian Reformer.

Tula, Russia, Nov. 23.—Throughout the night and during the early hours of today special trains arrived at Zaseika, the railway station near Yasnaya Poliana estate, bearing delegations to the funeral of Count Leo Tolstoi.

Following Tolstoi's written request, his grave has been made under Poverty Oak, "the spot where in childhood we buried a green rocking horse."

This reference was an episode in the early life of Tolstoi and his brothers, who with childish rites consigned to the earth a hobby horse in the belief when it was disinterred a reign of happiness would be inaugurated.

The novelist often referred to the disposition of his body and in directions left specified explicity that the ceremony incident thereto should be of the simpliest "without the rites of the Orthodox church."

The special train bringing the body from Astapova arrived at the Zaseika station at 8 o'clock this moning. The funeral party was met by throngs of mourning peasants. According to tthe Russian custom Tolstoi's sons were the bearers, and carried the casket on their shoulders over the two miles separating the station from the novelist's home at Yasnaya Poliana.

The way was lined with mourners. Peasants marched at the head of the procession carrying white banners inscribed "Leo Nikolaivica; "The Memory of Your Goodness Will Never Fade from the Minds from Us Orphaned Peasants."

Following the Peasants were two student choirs chanting memorial hymns and four carriages filled with weaths. Then came the sons trudging slowly under the weight of the casket. The counters and others of the family followed in their bier afoot. Arrived at the house the cotege halted and the casket was borne within and placed upon a catafalque erected in the author's favorite room

Here, in the old home, from which Tolstoi fled twelve days ago to seek the solitude that was to be denied him, the body lay in state.

Just before the sunset the casket was carried to the grave about which the family and close friends of the dead man knelt. The choirs sang the hymn: "Everlasting Memory" but there was no other ceremony. In silence the casket was lowered into the ground the filling in proceeded at once and within a half hour from the time the funeral party arrived at the spot a mound of broken earth marked the chosen resting place for the body of the Russian reformer.

SAVANNAH'S BIG DAY.

Monument Erected to Oglethorpe—Three-Day Carnival Begun.

Savannah, Ga., Nov. 23.—The memory of Gen. James Edward Oglethorpe, the founder of the colony of Georgia, was fittingly honored here today by the unveiling of a statue erected by the State of Georgia, the city of Savannah, the Sons of the Revolution, and through private subscriptions. The monument, which cost $40,000, stands in Chippewa square on Bull street, the most prominent thoroughfare in Savannah. Its erection gives to Bull street a monument in every one of the squares provided as a part of Savannah when Oglethorpe himself laid out the plan of the city in the 17th century.

The unveiling of the monument was an interstate and international event, being participated in not only by the Governor of Georgia and the Governor of Alabama, but the representatives of the English government. There were three addresses heard this morning following the invocation by Right Rev. F. F. Reese, bishop of Georgia. One was from Hon. J. Randolph Anderson, of Savannah, chairman of the Oglethorpe monument commission authorized by the Georgia Legislature, the other by Hon. A. Mitchell Inness, acting ambassador from the Court of St. James, and the third by Hon. Walter G. Charleon, judge of the superior court of Chatham county, who delivered the principal address of the occasion. At the conclusion of his address the American and English flags in which the figure was draped, were drawn aside by Gov. Joseph W. Brown of Georgia, and Mrs. J. J. Wilder, State president of the Colonial Dames.

Today's ceremony begins a three-day military and sports carnival in Savannah which includes motor cycle races and the football game between the elevens of the University of Georgia and Auburn, Ala., tomorrow afternoon.

INTERSTATE COMMISSION.

Why Commercial Travelers Should be Given Representation.

New Orleans, Nov. 23—The commercial traveler, more than all other classes, is constantly testing the reasonableness and accuracy of the rulings of the traffic men, is the declaration made in a statement issued here today by W. O. Hudson, president of the Travelers' Protective Association, of America, in urging the appointment of a member of that organization to the Interstate Commerce Commission upon the occasion of a vacancy.

"It is the traveling man who notes the effect of rulings on both the consignor and consignee, and who is best adapted to anticipate the final result," President Hudson asserted.

ROBERT C. CLOWRY RESIGNS.

President of Western Union Will Retire.—Carlton Elected.

New York, Nov. 23.—Declaring that after having engaged in the telegraph business for more than 50 years he felt that he is entitled to retire and take a much needed rest, Robert C. Clowry, president of the Western Union Telegraph Company today tendered his resignation to the board of directors and Theodore N. Vail, president of the American Telephone and Telegraph Company, which controls the Western Union was appointed to fill the vacancy

Newcomb Carlton, of the British Westinghouse Company, was today elected a vice president of the Western Union Company. Colonel Clowry continues as a director and member of the executive committee of the Western Union.

BROWN CREEK DRAINAGE.

Plans Contemplate Reclamation of a Large Area in Anson.

(Special Star Correspondence.)

Wadesboro, Nov. 3.—Delegates representing the Brown Creek Drainage Association are in the meeting of the North Carolina Drainage Association at Wilmington this week. It is expected that when they return they will be able to advise the members of the local association concerning the best steps to be taken looking forward toward the redemption of the 90,000 acres of land, affected by the creek in Anson county.

The drainage of Brown Creek Swamp will mean much to Anson county. For 28 miles through this county Brown Creek winds its way and it is estimated that almost 40,000 acres of land is affected by the stream. Much of the land is easily worth $100 an acre and some of it could not be bought at twice that figure, if the stream was drained.

Land along the banks now is valued at $100 an acre and one man says that his land is renting for a fourth of that amount each year, of course he would not sell it at that price. The timber will be worth many thousand dollars if the creek is drained so that it can be cut and removed. A conservative estimate is that the proper drainage of the stream will add a million dollars worth of real estate to Anson county by reclaiming this vast section which cannot be cultivated in its present state.

Various estimates have been given as to the cost of the work, but since no survey has been made it is impossible to know the exact cost. Even if the cost is $50,000 and this is regarded as a conservative estimate, it will be a big money-making proposition. Another feature which has not been considered, in addition to fertile soil and valuable timber, is the fact that these swamps will have a wholesome effect on the health of the section. For many years people living around the creek have suffered with malaria and its kindred troubles. There is no doubt but that the benefits from the health side alone will be worth the cost.

"OLD GLORY" HOSS SALE.

Prices Took Sudden Jump.—Senator Bailey a Buyer.

New York, Nov. 23.—Prices took a sudden jump at today's sessions of the "Old Glory" Hoss sale in Madison Square Garden. Total sales registered more than $55,000 and an average of $588 was maintained throughout the sale of 100 animals.

Senator Joseph W. Bailey, of Texas, was one of the largest buyers of the day.

Six horses were bought for his Fairyland Farm, at Lexington, Ky., at an aggregate of $11,000. He paid the stiffest price offered for any horse up to date, buying Morgan Axworthy, a three year old bay colt with a trotting record of 2:06, from John H. Schults, for $4,000. Queen Worthy brought the next highest price of the day, $3,700, which was paid by A. H. Cosden, of this city.

Ecstatic, a pacer, 2:01 3-4, brought $3,000. J. D. Calley, of Pittsburg, paid $2,725 for Nell Olcott, a three year old trotter.

Among the purchases made for Senator Bailey's Fairyland farm were: Deloree, $1,600; Owaissa, $1,000; Prince McKinney, $1,750; Petrovna, $1,250, and Miss Sub Rosa, $1,500. Irm Clifton was bought by R. L. Nash, of Lexington, Ky., for $1,000.

ABOLISH FOOTBALL.

Faculty of Tulane University Stirs Students to Protest.

New Orleans, Nov. 23—A movement to abolish football at Tulane University is advocated by members of the faculty of the institution has stirred the students to a vigorous protest against any effort in this direction. At a students' meeting last night resolutions were adopted declaring that they were "incontrovertibly and unanimously in favor of the retention of the game."

It was stated that the movement to do away with the game at Tulane was headed by Eugene D. Sanders, dean of the law department and former United States district judge at New Orleans, and that it had been given the admitted support of other faculty members. When asked his reasons for wishing to see football abolished, Dean Saunders declared briefly, "they are too many to state."

SOUTHERN TENNIS TOURNEY.

College Players May Have Contests at New Orleans.

New Orleans, Nov. 23.—A movement to hold a tennis championship meet between all colleges of the South is tentatively proposed by Tulane University. The proposition was discussed at a meeting of the students last night.

Definite plans for such a tournament to be held at New Orleans next spring probably will be announced within a short time, it was stated.

All the Cheerfulness of a Log Fire

When the thermometer gets down around the zero mark, with the wind howling and shrieking, sending shivers and creeps up and down your spinal column **it's a real pleasure** to pull your chair up to an open fireplace and sit there, watching the red hot coals or the blazing logs, forgetting all about the biting cold outside. **The very sight of this brings comfort to the body.** The open fireplace effect is approached very closely in the

FINANCIAL and COMMERCIAL

GAINS IN THE COTTON MARKET

New High Prices for Month Feature Yesterday—Caused by Buying by Strong Interests—The Bull Support.

New York, Nov. 23.—New high prices for the month were made in the cotton market today on buying by strong interests, who are said to have been converted to small crop views by the recent census figures and covering by shorts.

There was a good deal of reahzing for over-the-holiday tomorrow, but the offerings made very little impression on prices, and while the final tone was barely steady, last prices were at practically the best, showing a net gain of 3 to 11 points, and right after the close private sales were reported at the highest prices of the day.

The market opened steady at an advance of 2 points on December but generally 2 to 4 points lower and during the first few minutes sold off to a net loss of 3 to 5 points under scattering liquidation and local bear pressure inspired by expectations of heavy realizing before the holiday and the rather indifferent showing of the Liverpool market. The market was soon rallied, however, by a renewal of bull support, spot interests did not seem to be selling as much cotton as they did yesterday; there was talk of steadier Southern spot markets, and as prices worked higher, some of the earlier sellers turned to cover. There was some irregularity after May had sold above 15c, but all offerings were well absorbed suggesting the presence of a strong buying power confident of a bullish government estimate early next month and May cotton sold at 15.10 just before the close. Closing at 15.08 bid. The annual crop estimates of New York Cotton Exchange members were published before the opening, the lowest of 170 individual estimates being 10,650,000 bales, and the highest 13,000,000 with the average 11,927,000 bales, the figures having no apparent influence on the day's trading. Southern spot markets os officially reported early were 1-16 to 3-16c higher.

The American markets will be closed tomorrow but Liverpool will remain open as usual.

Receipts of cotton at the ports today were 61,826 bales against 75,302 last week and 30,116 last year; for the week 375,000 bales against 414,823 last week and 209,576 last year. Today's receipts at New Orleans 18,133 bales against 8,634 last year; and at Houston 14,130 bales against 9,294 last year.

Spot cotton closed quiet, 10 points higher; middling uplands 14.95; middling gulf 15.20. Futures opened steady and closed barely steady.

CONTINUES DULL FOR STOCKS

Brokers Absent From the Exchange. Volume of Transactions Unimportant—Money Conditions. Transactions.

New York, Nov. 23.—Many brokers were absent from the floor of the stock exchange today, having departed to anticipate the Thanksgiving Day holiday. As there was no intention on the part of most of them to return before Monday of next week the recent tendency towards dullness in the dealings in stocks became more pronounced.

The market at times was stagnant and the volume of transactions and the range of price fluctuations was unimportant at all times. The small net gains about equalled yesterday's declines.

The Mexican disorders received a good deal of attention as much from lack of any other topic for consideration as from a direct bearing on financial affairs in the United States. The amount of American capital embarked in Mexican enterprises, while considerable, is small relatively. The most pronounced effect of the news was seen in the early decline in the price of American Smelting among whose assets are some Mexican properties. The United States of Mexico 4 per cent. bonds sold down to 92 1-2, although previous to this week they had not sold lower than 94 1-4. Today's sales were only 10,000 par value. The National Railways of Mexico securities were slightly depressed, but the market for them was almost as nominal as for the government bonds.

Money conditions showed little change. The ruling rate for call loans receded again and little demand was shown either for call or time loans on collateral at the stock exchange. The market for mercantile paper was reported to show more disposition to take on choice grades.

A few specialties were marked up easily apparently by pools, but other inactive stocks made wide declines on single sales.

Bonds were irregular. Total sales par value $1,673,000. United States 4s registered advanced 1-4 per cent. on call. Total sales today 251,700 shares.

HUBBARD BROS. LETTER.

Reports from LiverPool and Manchester Good—Features.

(Special Star Telegram.

New York, Nov. 23.—Reports from Liverpool and Manchester were good, and the opening here was steady at a slight decline, which was quickly recovered, with the usual anti-Thanksgiving strength following.

The estimate of the members of the Exchange is 11,937,000 bales, and the local trade is becoming bullish under the influence of the continued smaller short crop talk, and any decline is quickly recovered. Later in the day came a rumor that Neill was reducing his estimate. The outside speculative interest is gradually being attracted to the market, which apparently has inducement for buyers, and is watching developments.

Southern spot centers show generally improved prices, as might be expected. The attitude of the mills is a matter of importance, and a government report of possibly 11,200,000 bales is commented upon. The recent ginners' report has made a onesided market, and sellers are few and very nervous. The question of how much the present price discounts the crop estimate of 11,700,000 is ignored for the moment while the bull fever dominates.

HUBBARD BROS. & CO.

THE GRAIN MARKET.

Chicago, Nov. 23.—Dwindling estimates of the Argentine expectable surplus gave the wheat market a chance to advance today. Fully 1,500,000 acres were, said to be seriously impaired, a large proportion lost beyond recovery. In consequence the close here was the same as last night to 1-4 to 3-8c higher. Corn too finished 1-4 to 3-8c up and oats likewise 1-8 to 1-4 to 3-8. In provisions last sales left quotations unchanged to 7 1-2c lower.

Wheat—No. 2 red, 92 3-4 to 93; No. 3, do, 1 to 92 1-2; No. 2 hard, 93 3-4 to 96; No. 3, 91 3-4 to 94 1-2; No. 2 northern, 1.06 to 1.08; No. 2 do, 1.05 to 1.08; No. 3 do, 1.03 to 1.06; No. 2 spring, 98 to 1.05; No. 3, 96 to 1.04; velvet chaff, 90 to 1.02; durum, 82 to 92 1-2.

Corn—No. 2, 48 1-4 to 4 1-4; No. 2 white, 48 1-2 to 4 1-2; No. 2 yellow, 51 1-2 to 3-4; No. 3, 47 1-2 to 48 1-2; No. 3 new, 44 1-2 to 45; No. 3 white, 4, 1-4 to 48 1-2; No. 3 do, new, 44 1-2 to 45; No. 3 yellow, 51 to 51 1-2; No. 3 do, new, 46 to 47 1-2; No. 4, 47; No. 4 new, 43 to 43 1-2; No. 4 white, 47 to 47 1-2; No. 4 do, new, 43 to 43 1-2; No. 4 yellow, 49 3-4 to 50 3-4; No. 4 do, new, 43 1-2 to 44 1-2.

Oats—No. 2, 30 1-2; No. 2 white, 33 to 33 1-2; No. 3, 32 to 32 1-2; No. 4 do, 31 3-4 to 32 1-4; standard, 32 1-2 to 33.

Prime mercantile paper 5 1-2 to 6 per cent. Sterling exchange firm with actual business in bankers' bills at 4.8215 to 4.8220 for 60 day bills and at 4.8610 for demand. Commercial bills 4.81 1-2 to 4.81 5-8. Bar silver 55 3-8. Mexican dollars 46.

30 YEARS OF SUCCESS.

The B. M. Hyde Co., Offer a Remedy for Catarrh. The Medicine Costs Nothing if It Fails.

When a medicine effects a successful treatment in a very large majority of cases, and when we offer that medicine on our own personal guarantee that it will cost the user nothing if it does not completely relieve catarrh, it is only reasonable that people should believe us, or at least put our claim to a practical test when we take all the risk. These are facts which we want the people to substantiate. We want them to try Rexall Mucu-Tone, a medicine prepared from a prescription of a physician with whom catarrh was a specialty, and who has a record of thirty years of enviable success to his record.

We receive more good reports about Rexall Mucu-Tone than we do of all other catarrh remedies sold in our store, and if more people only knew what a thoroughly dependable remedy Rexall Mucu-Tone is, it would be the only catarrh remedy we would have any demand for.

Rexall Mucu-Tone is quickly absorbed and by its therapeutic effect tends to disinfect and cleanse the entire mucous membraneous tract, to destroy and remove the parasites which injure the membraneous tissues, to soothe the irritation and heal the soreness, stop the mucous discharge, build up strong, healthy tissue and relieve the blood and system of diseased matter. Its influence is toward stimulating the muco-cells, aiding digestion and improving nutrition until the whole body vibrates with healthy activity. In a comparatively short time it brings about a noticeable gain in weight, strength, good color and feeling of buoyancy.

We urge you to try Rexall Mucu-Tone, beginning a treatment today. At any time you are not satisfied, simply come and tell us, and we will quickly return your money without question or quibble. We have Rexall Mucu-Tone in two sizes, 50 cents and $1.00. Remember, you can obtain Rexall Remedies in Wilmington only at our store—The Rexall Store, J. Hicks Bunting Drug Co.

TELEPHONE AND RAILROAD.

Whitakers to Have Exchange—A. C. L. Making Improvements.

(Special Star Correspondence.)

Rocky Mount, N. C., Nov. 23.—Whitakers, the Nash and Edgecombe county town to the north, between this city and Richmond, is to have a telephone exchange and over 25 have signified their desire for the service. For a number of years there has been telephone connection with Whitakers, the business having been handled through a toll station placed in a store there. At an early date the Home Telephone & Telegraph Company will begin upon the construction work for the new exchange which the managers declare will be an up-to-date magneto exchange, and will be one capable of taking case of the business of Whitakers for years to come.

The track improvement crews of the Atlantic Coast Line over the first division, are getting in some good work at present, while the plans of the company include the working of large forces and the placing of much new material for an improvement of the road bed. While the work is practically just started it is expected that several months will be necessary for the changes to be put in. Where heavier iron rails are needed the company is having it done.

For several miles north of this city, and continuing further, a steam derrick and a large force of hands have been unloading 85-pound rails alongside the track to replace the 70-pound rails now in use. The unloading of rails of the same weight south from Rocky Mount was begun yesterday, and the laying will begin, so it is expected, at an early date. We are reliably informed that as soon as the wrk of putting in the heavier rails on the main line is well under way, several track forces will be put to laying out and then placing the 80-pound rails into position to replace the lighter rails on the branch lines of the company between this city and Pinner's Point, a distance of over 100 miles.

Among the other improvements of the company is a ballasting of the main line tracks of the company between Dunlap, Va., a small junction just south of Richmond, through to Weldon. The entire track is to be raised six inches with the ballast that is being placed, and a force of hands is now on the job. The rock for the ballasting is being secured from the Pocahontas gravel pit, which is located on the R. F. & P., and two trains loaded with gravel are now being operated each day to the scene of the ballasting.

ILLICIT STILLS CAPTURED.

Federal Revenue Officers Capture Them in the Piedmont.

Columbia, S. C., Nov. 23.—Reports to revenue officers in this city state that twenty or more illicit distilleries have been destroyed in the upper part of South Carolina during this month.

The majority of the stills were destroyed in Greenville, Pickens and Oconee counties, the mountains of that section furnishing unsually fine natural advantages for the plying of this business.

The names of the owners of the stills are withheld by the authorities, who hope to make some good captures.

RUEF MUST SERVE TERM.

Court of Appeals Sustains Lower Court.—Convicted of Bribery.

San Francisco, Nov. 23.—The District Court of Appeals of the first district sustained today the conviction of Abraham Ruef, former political boss of this city, charged with having bribed supervisors. The court denied him a new trial.

The decision is contained in 46 pages, written by Presiding Judge Cooper and affirms the lower court on all points. Ruef had been sentenced to 14 years imprisonment and was at liberty on bail.

VIRGINIA EDUCATORS.

Miss Julia Richman Principal Speaker. —Large Attendance.

Richmond, Va., Nov. 23.—The Virginia Educational Conference in session here, was addressed twice today, in the morning and again in the afternoon, by Miss Julia Richman, of New York City, the well known authority on the nstruction of caildren, her subjects being "Juvenile Delinquency; its Causes and Treatment," and "Semi-efficiency."

The attendance of members of the conference is this year unusually large.

CRIPPEN HANGED IN LONDON PRISON

(Continued From Page One.)

new name and live where she is not known in order to escape further notoriety.

History of the Case.

The execution of Dr. Hawley Harvey Crippen in London today completed the criminal records of one of the most sensational of recent murder cases. The brutality of the crime committed by a man who had been known as of a gentle and kindly nature, the murderer's spectacular flight to his native land, and the fact that the case against the doctor was purely circumstantial combined to make the tragedy of absorbing interest not only in England where the murder was done but as well in America where both Crippen and his wife were born.

Crippen, slight in figure, was just past fifty years of age. He was born in Michigan and after studying medicine practiced in the United States and Canada. In 1906 he married Cora Mackamotski, of Brooklyn, a vaudeville actress whose stage name was Belle Elmore. They removed to London where the doctor engaged in dental manufacture. Soon there was domestic infelicity due, Crippen alleged, to attentions his wife received from other men. Then Ethel Leneve, a prepossessing woman now about 27 years of age entered Crippen's employ as a typist. She sympathized with the doctor and the two fell in love. Meantime Crippen and his wife were estranged.

Nearly a year ago Miss Leneve feeling her position keenly became impatient with the situation. About the same time the doctor was in need of money. Mrs. Crippen disappeared suddenly last February. Her husband inserted a death notice in the papers saying that she had succumbed to an illness while visiting in California. Actress friends of Mrs. Crippen persuaded Scotland Yard to make an investigation and the police officials interviewed Crippen on July 12. He threw the police off the scent but on the following day fled from London in company with Miss Leneve who was disguised as a boy. Subsequently their presence on board the steamer Montroso, was made known to Scotland Yard through wireless messages and as the Montroso was approaching the harbor of Quebec, Cripen and Miss Leneve were arrested. This was on July 31.

In the meantime the police had visited the Crippen home in Hilldrop Crescent, and in the cellar unearthened parts of a woman's body. The medical experts who examined these parts were never able anatomically to prove that they were from the body of Belle Elmore. Nevertheless the jury that heard the Crippen case were satisfied that they were.

Crippen was indicted and convicted of the murder of his wife the evdence including testimony that he had bought and administered poison after which he dismembered the body. He was sentenced to be hanged on November 8th, but secured a stay of execution until today. An appeal on his behalf was denied by the Criminal Court of Appeals and a petition for a reprieve was rejected by Home Secretary Churchill.

Miss Leneve was indicted and charged as an accesssory after the fact but was acquitted.

THE FIRST WOMAN TO FLY.

In the South at Birmingham Yesterday—Aviator Congratulated.

Birmingham, Ala., Nov. 23.—Mrs. Willard Sullivan, daughter of Dr. W. E. Evans, rector of the Church of the Advent, of this city, was the first lady in the South to take a trip in an airship. She went up at the fair grounds this afternoon with Ely, in a remarkably successful flight. Ely and Ward, of the Curtiss team, have been making flights here in connection with the Birmingham Census Jubilee and arrangements were perfected several days ago for Mrs. Sullivan to accompany one of these men.

Ely also received today a letter from Secretary of the Navy Meyer, congratulating him on his recent flight from the deck of the cruiser Birmingham and asking him if he will attempt a flight from the deck of a war vessel and then return, landing again on the deck. Ely announced he will make this trial and that it will be made at Santiago in about two months.

$10,00 LEFT TO BAPTISTS.

Neucleus for Purchase of Property for Alabama Headquarters.

Montgomery, Nov. 2.—A bequest of $10,000 from the estate of J. C. Bush, Mobile, who left $80,000 to various denominational institutions, has been received by the Alabama Baptist Mission Board.

The interest alone can be used and the money will be put away as the nucleus for a larger endowment, the ultimate purpose being to purchase property therewith in Birmingham, Montgomery, or some other city of Alabama for headquarters of Alabama Baptists.

Mr. Bush bequeathed $10,000 each to the mission board, the Baptist Orphanage at Eevergreen, Judson College for girls at Marion, and Howard College at East Lake. The remaining $40,000 was left to institutions outside of the State.

The most brazen piece of robbery in the tariff is the wool schedule and it is also the most oppressive, for it makes every man in this country pay $25 for every suit of clothes he buys that should be worth only $15. If the tariff is attacked piecemeal this should be the first point of attack.—Columbus (Ga.) Ledger.

The Greenville Reflector says there is enough swamp lands in Pitt county that if properly drained and cultivated would raise sufficient corn to feed the State. North Carolina has little excuse, indeed, for asking the West to ship us their corn.—Salisbury Post.

MADERO CLAIMS THE PRESIDENCY

(Continued from Page One)

tion, this fact not being known until after the revolution broke out. The arms were smuggled into Mexico largely by fording the Rio Grande southwest of this city in a remote ranch region. The Madero estates of Coahuila extend many miles along the Mexico side of the river at the point where the crossing was made.

During his operations here Madero talked freely of his opposition to the Diaz regime, but spoke of a peaceable revolution and denied any complicity with the revolutionary junta that has existed here for two years. The Madero family is the wealthiest in Northern Mexico. The loyalty of other members of the family has never been questioned with the exception of the father and brothers of Francisco. The vast resources of this branch of the family are supposed to be available for the use of the leader in the present outbreak.

During the more than 40 days that Madero spent in this country he was in constant consultation at one of the leading family hotels here with visitors from all sections of Mexico.

Just before Madero left to join the insurrectionists in Mexico, shipments of arms to a friend of his in this city were apprehended and the fact became known that he was actively leading the revolutionary party.

STILL ON RAMPAGE.

Militant Suffragists Renew Battle at Various Places in London.

London, Nov. 2.—The rioting of the suffragettes yesterday which began with an assault upon Premier Asquith, continued throughout the night. Driven from one district so many of the women as escaped arrest would gather at another point and renew the battle.

Advancing under cover of the fog at 2 o'clock this morning at militant band circumvented the police and stormed the Asquith residence in Downing street They hurled stones and metal weights at the houses, breaking the glass windows.

Earlier in the night the women smashed the windows in the homes of Sir Edward Grey, the foreign secretary; Lewis Harcourt, Secretary of State for the colonies, and Winston Spencer Churchill, the Home Secretary.

Augustine Birrell, the veteran secretary for Ireland, was the victim of the most vicious and serious assault. As a result of injuries from blows and kicks, the aged statesman is today confined to his bed and under the care of physicians. He has been compelled to cancel all immediate private and official engagements.

AERO INVENTOR IS DEAD.

Octave Chanute Died In Chicago—His Experiments.

Chicago, Nov., 23.—Octave Chanute, the "father of the aeroplane" died at his home in Chicago, after an illness of several weeks. His death was not unexepected for he had been for some weeks in feeble health.

Though widely known as an engineer of many accomplisaments, Mr. Chanute was more generally recalled as the originator of heavier-than-air craft. When, several years ago, he began experiments with "horizontal kites," as they were ironically referred to, he was considered eccentric. His persistence in trying out his ideas, resulted, however, in the Chanute Glider, which was nothing more or less than the modern biplane without the engine. With this Mr. Chanute was able to glide several hundred yards in a strong wind, by minipulation of its wings. An engine mounted on this and given a principal of warping wings for equilibrium, gave the Wrights their machine and others followed.

Octave Chanute was born in Paris, February 18th, 1932.

FLIGHTS AT MOBILE.

McCurdy and Post Successful in Trials at Mobile Yesterday.

Mobile, Ala., Nov. 2.—Three flights by Aviator McCurdy, one of which terminated in a slight accident and an attempted flight by Aviator Post featured the third day of the week's McCurdy was the first to make a aviation meet now being held here flight and after sailing high above the ground for some time, he alighted, the machine running along the ground toward the grand stand. McCurdy misjudged the distance to the stand and when he saw that he would crash into the stand he swerved the machine quickly, it turning to one side and tearing away one of the planes. It was repaired and in a short time McCurdy made another successful flight. Post then attempted a flight but before he left the ground his engine went wrong and he nevr ascended. McCurdy ended the day's programme with a fine flight remaining in the air several minutes an alighting perfectly.

A THREE-CORNERED MATCH.

Event for Professional Bicycle Championship—The Race.

New York, Nov. 23.—A three-cornered match race for the professional bicycle sprinting championship of the world in which the champions of America, Europe and Australia will compete, was arranged this afternoon to take place at Madison Square Garden on Saturday, December 3rd, the night before the start of this year's six day race.

Frank Kramer, who has held the title in this country for the past ten years; Walter Rutt of Germany, who has taken the measure of all the European cracks, and Jack Clark, the little Australian short distance champion from the trio of starters. The race is to be run in heats, best two out of three or three out of fur, if a fourth is necessary. The first heat will be at one-half mile, the second at a mile and the other to be decided by the toss of a coin.

TO COMPLY WITH DICK LAW.

National Guard of Mississippi Will Be Re-organized Shortly.

Jackson, Miss., Nov. 2.—To meet the requirements of the Dick law, a thorough reorganization of the Mississippi National Guard is proposed.

The first steps to be taken with the opening of the New Year will be the establishemnt of a general staff and officers' board headed by Adjutant General Arthur Fridge.

The Raleigh Times asks for information as to the whereabouts of Candidate McNinch. It is a pleasure to state that after a brief period of Oyster Baylcal meditation he has emerged from Catawba river fastnesses to hurl charges of "bribery" into the teeth of his triumphant tormenters.—Charlotte News.

Kelsey Heating

Going to Build? What About Heating?

There is just one right way to warm a house and that is with fresh air direct from out-of-door, warmed to the correct temperature—not scorched or burned—and then FORCED to every room in the building.

The KELSEY Warm Air Generator with the Zig-Zag Heat Tubes is the only warm air apparatus that will accomplish these results even under the most trying conditions.

Some of the good reasons for the efficiency and economy of the KELSEY are: It has double the weight and heating surfaces of the ordinary furnace, warms air by a better method and utilizes all the heat to much better advantage. The Zig-Zag Heat Tubes do it. 30,000 sold—Sales increase every year.

HONOR OF CARDINAL GIBBON'S

Twenty-Fifth Anniversary of Prelate's Reception of Red Robe at Hands of the Pope—Notable Ceremonies.

(Copyright by the Religious News Syndicate.)

The greatest celebration ever held in honor of a dignitary of the Catholic Church in America will take place in Baltimore, Md., in June, 1911. The ceremonies will celebrate the 25th anniversary of Cardinal Gibbon's reception of the Red Robe at the hands of the Pope.

The arrangements have been practically completed and if the present program is carried out fifteen Cardinals from Rome will be in attendance, and thirty-five Archbishops and seventy Bishops of the Catholic Church in America will also be present.

It is expected that innummerable pilgrimages will be made from Europe Mexico, Canada and South America. In fact pactically every diocese of the Catholic Church throughout the world will pay homage to Cardinal Gibbons on this occasion.

According to the plans already made the ceremonies will be of more impressive character than have ever been seen at any church celebration in this country. The musical program will be of the highest order. Picked voices will take part and many of the most from all the best choirs in America celebrated musicians in the world have volunteered to lend their aid in making this part of the program a success.

The celebration will include High Pontificial Mass and other religious ceremonies befitting the great occasion.

History of Cardinal Gibbons' Service in the Church.

His Eminence, James Monsignor Cardinal Gibbons was born in Baltimore, Md., July 23, 1834. When very yonug he was taken by his father to Ireland to be educated. He returned to America in 1853 and resided in New Orleans until 1855, when he matriculated at St. Charles College, near Ellicott City, Ind., where he was graduated with distinction in 1857. He then pursued his theological studies at the Seminary of St. Suispice and at St. Mary's University in Baltimore. On June 30, 1861, he was ordained a priest his first mission being at St. Patrick's Church, Baltimore, where he was assistant. Transferred to St. Bridget's Church, Canton, Ohio, he ministered to a small congregation until 1865, when Archbishop Spalding made him Chancellor of the Arch Diocese and his private secretary. The Plenary Council at Baltimore in 1866 made him its assistant Chancellor.In August 1868, he was consecrated titular Bishop of Adramyttum "in partibus infidelium" and first Vicar Apostolic of North Carolina, erected by bull of His Holiness, Pius IX, dated March 3, 1868. He found three churches, two priests, and about one thousand Roman Catholics scattered over the entire state. He opened a school, which he personally conducted built six churches, introduced into the vicarate the Benedictine Order at Belmont where Mary Help Abbey was later erected. He established the Sisters of Mercy and built for them a school for whites and one for negroes in Wilmington. He made the personal acquaintonce of every adult Roman Catholic in the state and met them at their homes, traveling from the seaside to the mountains, up and down the state, that no one should be neglected. After four years he was transferred to the See of Richmond in 1872. Here he erected five churches, St. Peters, and St. Sophia's Home for Old Poor, in Richmond, Va. He built parochial schools in Petersburg and Portsmouth, Va., and enlarged St. Joseph's Female Orphan Asylum in Richmond.

In 1877 Archbishop Haley asked to have Bishop Gibbons appointed his coadjutor and on the death af the Archbishop in October of that year Bishop Gibbons became Archbishop of Baltimore, the then highest ecclesiastical dignitary of the Roman Catholic Church in America. He headed the delegation of American prelates who visited Rome in 1883 to represent the Vatican and to outline the work for the Third Plenary Council to meet in 1884.

Pope Leo XIII appointed Archbishop Gibbons to preside over the Council and in directing the proceedings he co-operated in the enactment of many important new decrees made necessary by the progress and developement of Catholicism in America, and these acts were after mature deliberation, aproved by the ecclesiastical authorities. Leo XIII expressed his aproval of the actions and course of Archbishop Gibbons and on June 7, 1886 created him Cardinal. On June 30 of the same year an emmissary from the Pope bestowed on him the insignia of his new office. Cardinal Gibbons sailed for Europe the next year to receive the Apostolic Benediction and to be admitted to membership in the College of Cardinals, he being the 25th in succession.

On March 25, 1887, Cardinal Gibbons was installed pastor of his titular church and was assigned to the Church of Santa Maria in Trastevere, a church of great antiquity on the Tiber. He returned to America in November, 1887, and on May 24, 1888, he laid the cornerstone of the Catholic University in Washington, and dedicated the building November 13, 1889. Cardinal Gibbons has been Chancellor of the University since its foundation.

In November, 1888, he celebrated at Baltimore the centenary of the founding of the Catholic hierarchy in the United States and subsequently convened a congress of Catholics, the first ever held in this country.

Cardinal Gibbons is president if the Bureau of Catholic Indian Missions and is the first American Cardinal to take part in the election of a Pope. He has published books, the most widely read being "The Faith of Our Fathers"

The archdiocese of Baltimore over which Cardinal Gibbons presided has a Catholic population of more than 250,000. It has about 400 priests, 270 churches, nearly 100 parochial schools, besides seminaries, hospitals and other institutions.

ON PREVENTABLE DISEASES

Dr. C. F. Strosnider, Formerly of Wilmington, Now With Hookworm Commission—Talks Interestingly of Health.

Dr. C. F. Strosnider, formerly of Wilmington, but now with the National Hookworm Commission in its campaign against the new disease in the South, has been in the city for several days and recently talked very interestingly with a representative of the Star on preventable diseases and the necessity of safeguarding the health of the child. In speaking of this subject in connection with his work, Dr. Strosnider said:

"The management of the child from infancy to the age of 16 years, is the period of phenomenal development, and it is during this period that the foundations are laid of those factors which make most for success in after life—a well developed body, sound health and a good digestion. Insofar as these fall short of the normal, just so far does the individual miss his full effectiveness in the world's work.

"The loss to the State of North Carolina in earning power from preventable diseases such as tuberculosis, typhoid fever and hookworm, is enormous, even though we are already in possession of proyhylactic measures of everyday medicine, which, if conscientiously applied to each member of the community, would produce incalculablelble results.

"Few will deny that the recent victory of Japan over Russia, which was up to this time thought to be the peer of any Nation as regards army emciency, was due to Japan's sanitation. Russia lacked that fundamental which so many sections of our State are deficient in today, and that is the application of the principles of sanitation. Japan taught the world the most practical and demonstrative lesson ever enunciated in sanitation. War records previous to the Russo-Japanese war showed that equally as many, and ofttimes more, men succumbed to disease than to bullets.

"So long as it is considered good business policy to study and apply devices which make labor more effective, there is nothing vague or visionary in applying to the future laborer health-saving devices which will make him physically and mentally fitter for his work.

"Since the foundations of a sound physique are laid in infancy and childhood, and .. neglected cannot be rebuilt, we have a problem worthy of our most earnest consideration. When we consider the cost of living out of proportion to the increase in wage we have a condition which enhances rather than lessens these hereditary and congenital weaknesses which cause many deaths in early infancy.

"The question of hygiene and sanitation is an educational one which will take much time to get firmly fixed on the minds of our good people.

We must make it plain to our people that no man has a right so to keep his house or so to live his life in a civilized community as to jeopardize his neighbor's health or happiness. Again the duty of keeping clean in a physical sense is as high as that of moral cleanliness.

"Is it not infinitely wiser to prevent the pollution or our drinking water or food than to fight the result of that pollution, as the case with typhoid fever gotten by drinking dirty surface water or eating food polluted by flies which have come in contact with a typhoid fever case?

"Again, is it not wiser to prevent soil pollution by using sanitary privies and thereby eradicate hookworm disease which at present exists in the central and eastern part of our state to the extent of from 36 to 58 per cent. than to allow this easily preventable disease to go sapping the life-blood out of our beloved children, dwarfing them mentally and physically for life and in numerous cases, directly and indirectly by other diseases, causing death?

"Shall we not vaccinate all our people at a cost of 25 cents each rather than leave some hundreds to die annually and other thousands to be branded with scars, a living shame to community?

"Would it not be wise to prevent stagnant water around our homes and thus not have a mosquito hatching place, and screen our homes at small cost against the mosquito, which causes malaria or bilious fevers, than to allow this pest to enter our homes and cause long illness and ofttimes death?

"Then we must start with the little ones, and after seeing that their mothers are instructed in the hygiene and clothing, remove the notion that the children must of necessity have measles, whooping cough and hookworm diseases, by showing them that these diseases are ideal foundations on which to build future woe in the shape of consumption.

"The best way to fight consumption or any other disease is with a sound body; the boy who grows up to be a man of affairs must have sound lungs stomach, eyes, ears, teeth, and good muscular developements.

"Every school in the State should have a medical supervisor or inspector to inspect the eyes, mouth, ears and general condition of all children in attendance in order that disorders may be detected at a time when they could be cured. As an example, cross-eyes, detected early can be cured; ear trouble, detected early can be cured, diseased tonsils, removed early prevent rheumatism and poor health. Hundreds of our friends are today going through life cross-eyed or blind, near or far sighted, or deaf, or dwarfed mentally or physically from hookworm disease, as a result of not receiving attention at the proper time.

"For the advancement of so important an issue, let us place the far reaching and lasting good of this work before our lawmakers and insist that they at least appropriate as much for the protection of their wives and little ones as for that of their swine, cattle and poultry.

"Shall we make preventative medicine a very real power in our State? Or shall we be content to consider it a side issue?"

Children Are Blessed With a Sweet Tooth

So are you—and you should encourage it, for the system demands *sugar* more than *meats*. Of the three nutritive elements which support life—sugar, protein and fat—*sugar* is the most important. You can't eat too much of it in its *correct* form.

It is the *native sugar* in good *ribbon cane syrup* that gives it its wonderful food value—the *whole* substance is *wholesome* sugar.

The "sweetness" of many syrups sold to the public is a little sugar or saccharine matter *added* to an insipid by-product "filler"—*tasteless* until the sugar is added. Such syrup, by itself, or made into cake and candy, has about as much food value as *shavings*.

ALABAMA SYRUP

is the finest example of a succulent Georgia *ribbon cane* syrup, made by the old plantation "open kettle" process, put into cans direct from the evaporator *while hot*—thus insuring the permanency of its *natural* sweet flavor and inimitable taste. It's the good *old-fashioned* taste you remember in your grandmother's pantry—the most welcome food children can have.

Any good grocer has it.

MISS WILSON IN RALEIGH.

High Praise For Talented Soprano Here Saturday Evening

(Raleigh News and Observer, 19th.)

The concert given by Miss Flora Wilson last evening in the auditorium of the State School for the Blind proved one of the most delightful events of its kind ever enjoyed by a Raleigh audience. The noted singer was greeted by an intelligent and appreciative audience, composed of some of the leading musicians of the city, and lovers of music.

The excellent program consisted of two parts, the first part consisting of eight selections and the second of twelve selections. The entire program was well received and was rendered in a most effectual manner.

Miss Wilson was accompanied on the piano by Mr. R. Blinn Owen, whose work was up to its usual standard of excellence.

Probably the most difficult number was the aria from Traviata, which was rendered most effectually, the singer giving the trills and runs very clearly. The Shadow song was another difficult number and in this also Miss Wilson was at her best. Not only in the numbers mentioned, but throughout the entire program, her sweet soprano was beautifully flexible and her enunciations wonderfully distinct.

The last number, being Mrs. Mary Speed Mercer's United, was enthusiastically received by the large audience. The solo parts were rendered by Miss Wilson, who was assistd in the chorus by the chorus class of the School for the Blind. While rendering this number, Miss Wilson was gowned in the Stars and Stripes, while a large bouquet of American Beauty roses lay on the piano at her left.

Miss Wilson enjoys the distinction of having rendered for the first time this splendid National Anthem in North Carolina, the home State of its Composer, Mrs. Mary Speed Mercer, of Rocky Mount. The music is simple, dignified and easy to learn. At times there is a suggestion of the French National Air, 'and very properly," said a well known Raleigh singer last night, "as the French's sympahies were with the Colonies in their struggle for Independence." The orchestral accompaniment is by John Philip Sousa, who arranged it of his own accord when he read Mrs. Mercer's excellent musical production.

Mrs. Mercer was in the audience last evening, having come from Rocky Mount to hear "United" sang in public for the first time in North Carolina by Miss Wilson.

The program in detail as rendered by Miss Wilson last evening was as ollows:

Program—Part. I.

I. (a) Villanelle, Chaminade; (b) Obstination, Fontenailles; (c) Waltz Song (Romeo and Juliet) Gounod—Miss Wilson.

II. (a) Winds in the Trees, Goring Thomas; (b) the Wood Pigeon, Lehmann; (c) You anu I, Lehmann; (d) Years at the Spring, Beach—Miss Wilson.

III. Shadow Song (Dinorah), Meyerbeer—Miss Wilson.

Part II.

IV. (a) Still Wie die Nacht, Carl Bohm; (b) Fruhlingsnacht, Schumann—Miss Wilson.

V. Ah fors e lui (Traviata). Verdi—Miss Wilson.

Selection—Orchestra.

VI. (a) A Highland Laddie, Gilbert; (b) The Lass With the Delicate Air, Arne; (c) Afton Water, Burns; (d) Annie Laurie, Anon; (e) Very Kind to Me, Harry Lauder.

VII. (a) Little Orphant Annie, Whitcomb Riley; (b) If No One Ever Marries Me, Lehmann—Miss Wilson.

VIII. United, (National Anthem), Mrs. Mary Speed Mercer—Miss Wilson and Chorus from Blind School.

After her concert last evening, Miss Flora Wilson, daughter of Commissioner of Agriculture Wilson, of Washington, was the guest of honor at a delightful reception, given by Mrs. William J. Andrews, whose guest Miss Wilson has been while in the city. During the reception between three and four hundred called, and the occasion was one of the most charming of the season.

Will Promote Beauty.

Women desiring beauty get wonderful help from Bucklen's Arnica Salve. It banishes pimples, skin eruptions, sores and boils. It makes the skin soft and velvety. It glorifies the face. Cures sore eyes, cold sores, cracked lips, chapped hands. Best for burns, scalds, fever sores, cuts, bruises and piles. 25c at Robert R Bellamy's.

ADDRESS OF CHAIRMAN KNAPP.

Annual Dinner of Railway Business Association in New York.

New York, Nov. 22.—Martin A Knapp, chairman of the Interstate Commerce Commission, delivered an address this evening at the annual dinner of the Railway Business Association. He said in part:

If our country is to grow and prosper we must have railway earnings sufficient for three things:

First. A return on railway investments of such amount and so well assured as to attract the necessary capital to improve existing roads and construct thousands of miles of new lines in fruitful districts now destitute of any means of transportation. It is a matter of common knowledge that the output of traffic for the fiscal year 1907 exceeded our entire carrying capacity on land and water. Since it is our national policy— and long will be, I trust—to rely upon private capital and private enterprise to provide these great highways of commerce, must we not in the larger public interest, whatever may be thought by this or that shipper, make the business of furnishing railroad transportation so desirable to the investor that the necessary funds for betterments and extensions will be forthcoming, and so attractive as a vocation that the highest ability will be employed in its management? Otherwise, must not our country come measurably to a standstill and face a future of comparative stagnation?

Second. The payment of liberal wages to an adequate number of competent men. This not only to insure increasing skill and reliability, but also because of the great influence of railway wages upon compensation of labor in private employment. The fundamental social problem is to provide without radical action or injustice, for a more equable diffusion of the wealth which the earth produces.

Third. The betterment of existing lines without unnecessary increase in capitalization. Every dollar borrowed to improve a road now in operation involves a permanent addition to the interest charge which the public is required to pay; the improvement from current earnings puts no lien upon the property but by adding to the security of the capital already invested tends to a lower rate of interest upon that capital. This means a national policy in respect of railroad rates and revenues in harmony with our national policy in other matters, and in accordance with that enlarging spirit of altruism which impels the present assumption of burdens that might be escaped or deferred in order that another generation may have an easier task and a larger opportunity. Is it not in this particular field a wise and patriotic policy?

R. F. & P. STOCKHOLDERS.

Earnings Increased During Past Year—Officers Elected.

Richmond, Va., Nov. 21.—The annual meeting of the stockholders of the Richmond, Fredericksburg & Potomac Railroad Company was held here today. The report of the president and directors for the fiscal year ending June 30, 1910, show that notwithstanding the increased cost of operation the economics which were practiced with the increase in the volume of business enabled the company to reduce the ratio of expenses to earnings from 64 per cent. for the year ending June 30, 1909, to 61 per cent. for the year ending June 30, 1910.

William H. White was unanimously elected president and the following were chosen as the board of directors:

George W. Stevens, N. S. Meldrum, W. W. Finley and Alexander Hamilton. J. Taylor Ellyson was announced as director on the part of the commonwealth of Virginia.

At the annual meeting of the stockholders of the Washington Southern Railway Company, William H. White was unanimously re-elected president and the following directors were chosen:

W. W. Finley, N. S. Meldrum, Samuel Rae, George W. Stevens, H. Walters, Daniel Willard and William H. White.

SHOE MAKING FACTS

No. 2

CRADDOCK
Vamps, Stays, Tops

We've told the story of Craddock soles and counters and heels—how honestly they are made of the very best leather that money can buy. You can understand now why some shoes break down after a few weeks wear and one or two unfortunate wettings, and why Craddock Shoes are called Long Wear Shoes.

Craddock vamps and tops and linings have their share of the bumps and strains to stand and that they do stand them is because of our care in the selection of the skins and the careful cutting of each shoe part from the best part of the hide adapted to its use.

Craddock Vamps (7) are cut from the "heart" of the hide, the toughest part of the whole skin. The tops (8) are cut from the next toughest parts—the soft, spongy flank leather is never used.

The back stays of a shoe (9) are small parts but very important. They take an enormous amount of strain. Craddock stays are selected from small pieces of the very choicest part of the skin.

You wouldn't think that any shoemaker would scrimp on linings—but they do. It only takes a little piece—it ought to be of the best, but if a fraction of a cent is saved on every pair it will amount to hundreds of dollars in a year. Craddock linings are of the strongest duck—even away down inside where you can't see. There is no seam in the toe to raise the mischief with your feet.

Go to the Craddock dealer in your town and talk shop with him. When you once know the Craddock shoe—you will have found your money's worth of wear—style—comfort.

Nation-Wide Interest in Outdoor Sports To-Day

OUTLOOK FOR ICE HOCKEY IN PITTSBURG

Promoters Find the Professional Game Too Risky and the Amateur Play Too Unprofitable.

No more glaring example of the imperative need of an international governing body in hockey, one which will be empowered with the same unrestricted authority enjoyed by the national commission in baseball, can be had than the deplorable situation in Pittsburg.

There is to be no hockey in what once was one of the most active centers of the sport in this country during the coming season.

This is not due to any lack of interest in the sport. The fans of that city want hockey, but they want professional hockey.

Up until last season they have been educated to and fed on the faster and more exciting play of the salaried puck chasers, and when they were deprived of this style of game and offered the amateur game last year they could not expect to be as satisfied with it and thrive as substantially on it.

It was made necessary to offer them amateur hockey because of the lack of some one body which would have jurisdiction over the players, both in this country and in Canada.

Back in the season of 1908-9 hockey in Pittsburg started particularly early, and a number of the professional players in Canada figured that they could pick up some easy coin in that city for a couple of months and then just as soon as the season opened in Canada pack their kits and leave the Pirate promoters in the lurch.

This was predicted long before it happened, and just as soon as the big league season in the Dominion started the majority of the players beat it back. There were a few who had decency to stick it out, but it was necessary for several of the teams to borrow reserve players from the rest of the clubs in order to finish out their schedules.

The players can hardly be blamed for taking this advantage of laxity on the part of the promoters of the game. The life of a hockey player is but very short at best. The game is too strenuous for them to last long, and they are going to grab all the coin they can while the grabbing is ripe.

It is time, however, that the promoters in this country at least—Canada doesn't have to worry as much about it as yet—should get on the job and make overtures to the Canadian officials concerning the forming of some sort of substantial alliance whereby the player guilty of jumping his contract could be blacklisted and a holdout could be dealt with as they deal with him in baseball, by not permitting him to play with any other team.

In Canada they have trouble with contract jumpers, but they are never troubled for the want of players. There are hundreds of them to be plucked. Of course they are not all classy, but Pittsburg could not get any kind.

Minnesota Establishes Rowing Camp.

The Minnesota State university has established a rowing camp on the shores of Harrison bay, at Minnetonka, under the direction of Dick Grant. Grant has succeeded in acquiring a large amount of shore line and has brought about the erection of a sleeping and dining cottage and laid out a football field, which can also be used for other sports. Next year Grant hopes to have a crew to race against Wisconsin, while the movement may result in the establishment of a western college rowing association like the big eastern university meet at Poughkeepsie, N. Y.

FORWARD PASS OVER LINE PROVES A BOOMERANG AT TIMES

© 1910, by American Press Association.

HOW TO THROW AND RECEIVE THE FORWARD PASS.

WHEN the football rules committee members were struggling last winter with the code, to the end that the game might be made safer and the players protected against serious injury, the forward pass was the rock on which they split. Some were in favor of abolishing it altogether after a more or less unsatisfactory trial for three or four years, some urged that it be limited behind the line of scrimmage, as was the suggestion advocated by many experts, while others, and the majority, as it turned out, fought for its retention, with the removal of some of the restrictions with which it had been hedged about.

It is safe to say that the rulemakers are not yet through with what many now consider the old man of the sea to latter day football. The rule governing its use may not be amended this winter, as one season is hardly enough for a thorough and complete test, but experts do not hesitate to predict that in due time it will be modified in a more or less radical way and limited to use behind the line of scrimmage. By limiting the pass to a zone of twenty yards and so preventing the long heave down the field, which the Yale eleven perhaps worked to better advantage than any other team, an effort was made to discourage the reckless tossing about of the ball as a last resort measure as well as to provide better protection for the man receiving the ball. In doing this, however, the usefulness of the play was restricted to some extent.

In any case, the forward pass is not winning the favor of the players and coaches which its supporters so earnestly hoped and expected. It is being used, and with good results, by some teams, but its value lies more in its menace than its ground gaining powers, except perchance at Pennsylvania, where the coaches have been quick to realize and take advantage of its effectiveness when used behind the line of scrimmage.

Pass Makes Trouble For Officials.

When the rule was changed as it now stands it was argued that in the scramble for the forward pass there would always be an element of risk. This, the rulemakers say, cannot be possible if the officials of the game insist that the rule in regard to interfering with players is strictly enforced. It is evident that officials have more on their hands this season than they have encountered in all the trials and tribulations which have been theirs in football.

Something about the use of hands and arms will not come amiss while discussing the subject of the forward pass. The player running with the ball may ward off opponents with hands and arms. That has always been the case.

Here comes something in the line of what has just been written which should be grasped by every player who takes part in a game:

"No player while in the act of catching a forward pass shall be tackled, thrown, pushed, pulled, shouldered or straight armed until he shall have caught the ball and taken more than one step in any direction, provided that any such interference, which is incidental to a bona fide attempt to catch or intercept the ball, shall not come within this prohibition."

Last Season's Troubles.

In that category of evils is defined everything which was put in use last year to put the man catching the forward pass out of commission before he got his hands on the ball. In effect it means that if a forward pass is merely touched or fumbled by a player no player on either side may even then interfere with an opponent until the ball is actually in possession of a player except in a bona fide effort to get the ball.

It is not very difficult to tell the difference between a bona fide attempt to get the ball and a bona fide attempt to drop the man who is about to catch the ball. There have not been many of those tricks this year by which players in concerted attack got rid of the man who was about to receive the ball. If one player jumps for the ball and another of the defending side jumps for it at the same time it is not difficult for umpire, field judge or referee to rule properly on the play.

The forward pass in some degree—indeed, to a large degree—is protected similarly to the fair catch, and, having done that, the rulemakers are quite confident that they have put it on a basis where it will be more valuable in attack than it has been since the day it was adopted.

It is very well known that the opposition which aligned itself against the play came from men of substantial experience. They were opposed to it because they deemed it to be one of the most harmful plays of all football strategy. They did not think that it was good football to begin with and did not think that the player trying to catch the ball had anything like adequate protection against a field of charging men, and very likely there was a great deal more truth than poetry in their contentions.

Numbering of Gridiron Players.

In England football players are numbered. The innovation is bound to be adopted in this country. It's only fair to spectators that some system whereby contestants can be easily identified should be enforced. The only objection to the scheme is that opponents could identify opposing players. The advantages and disadvantages of this system would be counterbalanced, as both teams could use the information.

Still Kicking About the New Rules.

Every day brings some new protest against the intermissions between the first and second and the third and fourth playing periods. The coaches don't like it. It slows up the game for the spectators, and the doctors say it doesn't help any.

A NEW SIDE TO AN OLD STORY.

"Until two days before the fight Johnson had agreed to lay down to Jeffries. Johnson found out that Little was around betting on Jeff, and he sent word to Jeff that the 'frame up' was off and that the fight was going to be on the square. There were a number of busy meetings inside the next ten hours, but Johnson wouldn't listen to reason. He wasn't going to see George Little win any money, and it was all off. Then Jeff collapsed. No wonder—a championship in his pocket and have it picked."

Abe Attell, featherweight champion of America, gave utterance to the above explanation of Jeff's defeat by Johnson recently. It is the silliest and most absurd of all the yarns set afloat since the Reno affair. It does not stand to reason that Jeff if he expected Johnson to "lie down" would take the negro's unsupported word, especially in view of Johnson's peculiar record where his word was the only guarantee.

After Johnson had signed articles to box Langford in London and coolly repudiated his signature; after he had thrown over Sam Fitzpatrick, the man who took the negro out of the free lunch class and made it possible for him to enter on a roseate chicken devouring, auto riding existence; after he had deserted Little, who financed him in his training for the championship bout; after the negro had done all these things and shown that his word was worthless, it is not at all likely that Jeffries would have accepted his unsupported promise that he would "lie down."

On the contrary, had there been such an agreement between the men Jeffries would have insisted that Johnson be tied up with a contract supported by a sufficiently large cash forfeit to insure strict observance of the stipulation. Jeff is not so unsophisticated as Attell would have people believe, and if he felt that a purchased victory was necessary he would have seen to it that the contract was suitably backed by cash. "Philadelphia Jack" O'Brien invariably insisted that cash forfeits be posted by opponents who consented to take the count for a financial consideration, and the deal always went through without a hitch.

Those persons who bet on Jeff and are trying to explain his defeat by stories of "dope," "double cross," etc., have utterly failed to make out a case. Jeff was beaten by a better man.

ONLY ONE QUADRUPLE PLAY MADE

Veteran Baseball Fan Recalls a Freak Made In 1876

As far as baseball history goes, there was but one quadruple play ever made. Triple plays are made every year, and there have been unassisted triple plays, but there was just one quadruple play, and there may never be another.

Under the rules now governing baseball the opportunity for a four killing could never happen. The quadruple play was made a generation ago, and few of those who saw it are now in the land of the living. According to Ben Dodson, an old time fan, who was present on the memorable occasion, it took place in New York in 1876, and saved a game for the old Metropolitans of that ancient time.

"As nearly as I can recollect," says Mr. Dodson, "the Chicago club wanted to catch a train. They had a custom in those days—it was last repeated as late as 1892 in the National league—of letting the underdog take two or three bunched innings, if so agreed, thus saving time, as the winning team didn't go to bat at all.

"If any one disputes this assertion they can find by looking through the files of 1893 an instance where the Chicago team permitted an adversary to bat for three successive asterisks, as though each round had been the last half of the ninth for the victorious club.

"On this occasion New York had the best of it by a tab of 9 to 3, and it seemed a cinch to put out the game, even allowing the enemy to take the eighth and ninth in a bunch. But the Chicago team rallied desperately, and it began to look as if, according to the understood agreement, the Mets would have to take their unused innings after all.

"The hits came in bunches. Chicago had driven in five runs. Two men out, bases full and four to be put out ere the seance could legally close.

"The batsman drove a furious liner knee high across the diamond. Covering short for the Mets that day was a little stocky fellow named Gaskins, who afterward became a star of the early Giants.

"The ball sailed to Gaskins. It seemed to drive his hands back as though they had been struck with a mallet, but nevertheless, with his wrists back between his knees, Gaskins held that ball.

"Like a flash he touched second, getting a runner who had left the middle station. He fired across to first, and the man who had been on the initial bag was pinned. The first baseman chucked over to third, and a runner who had been sliding for the plate arose to learn that he was out and that the quadruple play had been completed.

"It was so long ago and the games were so poorly recorded in those days that even the story of the four killing has passed from authentic archives. Nevertheless it happened, and doubtless the few old time players who were in that game could recollect the details.

"All I myself can clearly remember after all these years is this: That the circumstances were as I have said, that the quadruple play was really made and that it was an obscure infielder named Gaskins who pulled down that ball."

The Stanley Hockey Cup.

They are having a peculiar time with the Stanley cup in Canada. The Wanderers of Montreal won it last season, and that organization is no longer an active body. The trustees of the trophy do not just know how to transfer the cup to Mr. Doran, who seems to be the entire Wanderers' club at present, and at the same time give credit to the players who captured the trophy.

Ambidextrous Rule at Olympic Games Should Puzzle Americans

As the conditions now stand it is understood that the Swedes are going to inaugurate the ambidextrous rule at the next Olympic games—that is, in such field events as the discus, javelin, shot and hammer the competitors will have to throw with the right and left hands, the throws with each to be added, the distance achieved to be the athlete's performance. This may be all right for the Swedes, but what purpose it serves to be ambidextrous at putting the shot or other weight event is hard to understand.

Since Milo of Croton showed his great prowess at pitching the discus at Athens and Polydamus of Thessalia exhibited his wonderful accuracy at aiming the javelin men threw things with one hand, and it is their one single effort that has been recorded. Every man has a master hand, the same as he possesses a master eye. In athletic exercises where the hand is mostly used the performer at all times makes use of the better of the two. Some men use the left hand, but the majority use the right, but the man is always sure to bring into play the one with which he has the more power, and it is a fact worth remembering that men all over the world today who specialize in field events have to develop one hand or one leg and keep continually practicing with that one to maintain their places in the front rank of athletics.

That some athletes are endowed with a master leg or one leg which is better than the other is certain, and it does not follow that a right handed man always finds his right leg the strongest. One notable case worth mentioning is the holder of the world's broad jumping record of 24 feet 11¾ inches. He is a right handed man, yet he always took off with the left leg.

If this ambidextrous rule is allowed to prevail at Stockholm it may cause lots of confusion to the Americans, the English and other nations that are old in the practice of track and field sports. Of course there is a long time for men to get acquainted with this new wrinkle, and maybe the English and other nations that will have a word to say about the final makeup of the program may have this rule expunged. If it is not then the world may as well begin to accustom itself to the conditions.

In that case it might be consistent to have jumping contests, the jumpers to take off with the right and again with the left and to have races first with the right side to the track and to run the same distance with the left side in. It would be also well that fencers should be made to use the right and left hands and that marksmen of all classes should sight with the right and left eyes in all their contests.

The introduction of this new rule to the Olympic meet illustrates the ridiculous things possible to green devotees in track and field sports when they get the whip hand of management in an international affair. The Swedes are ten years old in athletics and are even yet trying to learn what other people have known for generations, yet the first chance they get they introduce something which is only a step backward.

REMARKABLE OLYMPIC ATHLETES

If we are to believe the records of feats performed on the Olympian plain and in the sacred grove of Altis, in Athens, long before and long after our Christian era began, Greece boasted some athletes who could literally "make tracks 'round" their successors of today.

Where, for instance, would we find a strong man who could hold his own with Milo of Crotona, who thought nothing of carrying a four-year-old heifer on his shoulders through the stadium of Olympia and crowned this muscular performance by eating the animal in a single day? So sturdy were Milo's legs that, standing on an oiled disk, the next strongest man in Greece could not make him budge a fraction of an inch, while by merely causing the veins in his head to swell he could break a stout cord girdling his forehead as if it were a circle of thread.

There were phenomenal jumpers, too, in those long gone Olympian days, says London Answers. There was one Phayllus, for instance, who in one mighty leap cleared the amazing distance of fifty-five feet—more than twice the world's record jump of today. It is true that Phayllus had weights and a springboard to help him in his flight, but in spite of such assistance the jump remains one to marvel at, and, one would think, impossible to rival.

The old Greek boxers were no less doughty and formidable, and none but a man of bulldog pluck and muscles of steel could hope to stand up against their fists, incased in nail studded thongs. It was no uncommon thing for a combatant to leave a nose or an ear behind on the arena, and when Eurydamas of Cyrene had his teeth broken he calmly swallowed them and made no sign lest his opponent should chuckle and grow more confident of success.

The wrestling, too, was conducted on equally strenuous lines. It was often a struggle to the death, as in that terrible bout between Arrachion and his antagonist Arrachion was on the point of being strangled when by a last desperate effort he broke off one of his opponent's toes and won a dramatic victory. It was dearly won, however, for at the very moment of his triumph he died, and the crown of olive was placed on his corpse.

Morris, Yale's Center, One of Best In East This Season

Morris, Yale's sturdy center, has played a clever game for Eli all season. In every game his passing has been first class. Although he may not come up to Yale's star middle men of other years, still he has proved that he is the equal of any center in the east this season.

Joan, 2.06½, Looks Like a Champion

Horsemen generally look upon the four-year-old filly Joan, 2:06½, as a promising candidate for a two minute trotting record when she reaches the full powers that should come to her. She not only possesses speed to a sensational degree, but she has also the good manners, courage and soundness which make such speed valuable. Joan has an unusual history. Her dam, Sarah W., 2:18½, by Hal Bradin, was used by a Pittsburg man for matinee racing. A fall left her with a fractured hip, and her owner turned her out on his farm, almost forgetting that he owned her. One day the owner of Direction Spier, 2:11¼, suggested that he mate Sarah W. with that horse, saying that it would cost him nothing, and he consented. The following spring the mare's owner learned that she had foaled a filly, but so little did he think of it or about it that he never went to see it, and she and her dam ran wild, no one even taking the trouble to wean her until after she was a year old. Her owner never saw her until after she was a year old, and then he was so attracted by her beauty that he took her to his home stable, broke her to harness and found he had a trotter in her. He sent her to a trainer the next season, and she took a two-year-old record of 2:29¼ and attracted the attention of David Shaw, her present owner, who let no time pass until he had purchased her. In the season just closed the mare won close to $15,000. Her breeder still owns her dam and has from her two younger foals sired by Inoquette, 2:10, and she is now again in foal to Direction Spier.

YALE'S LIGHT BACK FIELD MEN PRACTICING QUICK STARTS

Under the new football code speed is necessary in the back field on account of the unlimited use of the forward pass and the rule which permits the man first receiving the ball from the snapper back to advance it at once. In the "reformed" rules which were in effect from 1906 to this season the speedy man became more of a star than ever before in the history of the game, while under the further improved code speed will be even more of a requisite. The old time heavy and plunging back field man is a thing of the past. The up to date back field warrior is no longer a gladiator, but a keen, scientific swordsman, looking for every possible opening and driving his thrust home with a splendidly developed right arm. Illustration shows the Yale backs at practice. Arrow shows Howe, last year's quarterback and in several games this year, who made regular fullback. He would have been considered impossible for that position last year on account of his weight, but this season he seems to be fit.

THE TRADE IN LATIN AMERICA

Great Progress Made and Vast Future Possibilities, Says Expert —Broad Field that Could be Profitable Cultivated.

Washington, November 23.—"Every month sees the establishment of new American business houses in South America," said Dr. Albert Hale, Chief of the Division of Information of the Pan-American Union, in an interview here today, "and almost all of these are proving highly succesful. There is no doubt that the great future for the trade expansion of the United States lies in our sister republics of the western hemisphere.

"Trade with these nations is increasing far more rapidly at the present time than with other part of the world. In 1900 our exports to South America amounted to $38,945,763. In 1910 they were $93,246,820, or nearly two and a half times the earlier amount. To the countries of North America, including of course Canada, we sent $187,594,625 in 1900 and $385,520,069 in 1910, a doubling in value. In the same period our exports to Europe advanced only 9 per cent in total value, while those to Asia and Africa show a slight decline between the beginning and end of the decade. Of course if our commerce with other countries is to grow we must take as well as give, and our imports from South America have more than doubled since 1900 while those from North American countries have grown even more rapidly. When one realizes how little has been done by American manufacturers toward developing a demand for their products in Lain America, it becomes evident that the possibilities in the systematic encouragement of reciprocal trade relations with our neighbors of the western hemisphere are simply tremendous."

Dr. Hale is probably the best informed authority in the world on conditions in the countries of Central and South America, having traveled through them repeatedly and being in close touch with correspondents in all the leading cities of these lands. His observations on the prospects of commercial expansion in the trade between these countries and the United States therefore possess exceptionl value.

"There is a common impression among Americans who have not informed themselves," said Dr. Hale, "that the merchant and manufactureer of the United States is handicapped in seeking South American trade by inadequate transportation facilities and high rates. Conditions in this respect have improved greatly in recent years. As the freight movement, and more particularly the passenger movement, is far greater between South America and Europe there naturally are more steamship lines in operation between these two continents and a great many more tramp steamships are in this trade. The liners running from American ports, however, are very good, substantial and efficient boats as is shown by the fact that few tramp steamers run between the two continents. There is no American line running south of the equator and naturally it would be a source of pride and satisfaction if our flag was more in evidence, but it is a mistake to say that there are no good steamships running to South America from the United States. The time is the same, or to some ports a little less, by the ships running from this country, and the rates are on a par with those from European ports. The American manufacturer who proceeds intelligently is able to compete in South American markets on equal terms with tnose of Great Britain, Germany, France and Italy, as shown by the success of those Americans who go about it systematically and who do not expect to capture a market without any adequate outlay of time, money and effort.

"A plan that is being adopted with good results by many manufacturers who do not feel like undertaking the expense of developing the South American field all by themselves is to make arrangements with other plants in allied or related lines and to have all of them work together through one agency. This is an excellent method for the small manufacturer. Americans are learning that they cannot build up trade simply by placing catalogues or samples with old-established houses having European affiliations but must do it by their own efforts and through their own representatives. These representatives of course must familiarize themselves with the trade customs and the language of those from whom they seek business and the manufacturer who is in a hurry for immediate results is likely to be disappointed.

"The better understanding that has come between the people of this country and those to the South of us within recent years has laid the foundations for great commercial expansion. We need many of the products of these countries and they can use rapidly increasing quantities of our manufactures. With the present efficient transportation facilities and reasonable rates, and with the growth in population and wealth of these neighboring nations American manufacturers ought to devite more careful attention to the markets of South and Central America and the results would be mutually profitable to both sides."

WILL NOT BUILD.

Dr. Crowell Says it Was Mistake About Sanitarium.

(Special Star Correspondence.)

Whiteville, N. C., Nov. 23.—Dr. Crowell says it is a mistake about his building a sanitarium on the Burkehead property. He says there is a movement on foot to build a new Presbyteraan church, and it is his intention to offer this property for its site. There has been some talk of building a Sanitarium in Whiteville, and your correspondent was reliably informed that Dr. Crowell was grading off this property for that purpose. But the general expression is that an up-to-date sanitarium will either be built in Whiteville or on Lake Waccamaw before long.

FOR BIG THANKSGIVING GAME

Carolina Squad Leaves for Richmond to be Ready to Meet Virginia Today—The Varsity's Outlook is Good.

Chapel Hill, N. C., Nov. 23.—The football squad of the University of North Carolina, 19 in number, left yesterday for some point in Virginia where they go through squad practice and take a rest, preparatory to playing Virginia Thanksgiving Day at Richmond. It is not definitely known to what place they went, but it is known that it will be near Richmond. Dr. Brides has taken this step so that the men will be in good condition for the game, and also to break the trip from here to Richmond.

The game on Thanksgiving day promises to be a good one. The teams are about evenly matched and it will be a battle royal. "Carolina" goes to Richmond with a determination to win or to die fighting. She has lost a number of games this season, which she ought to have won, and she means to put up a mean fight in Richmond.

The last scrimmage was pulled off last Saturday between the 'Varsity and the Scrubs. Dr. Brides had as his associates Trenchet, once coacn of Princeton; Simmons, who coached Davidson this year, and Cox; Busbee and Stewart, former North Carolina football stars. The scrimmage was fast and snappy and the 'Varsity made several touchdowns on the Scrubs.

The following is the line-up, which will probably open the game with Virginia on Thanksgiving day:

Left end, Applewhite; left tackle, Garrett; left guard, Thompson; (captain); center, Brown, right guard, McLean; right tackle, Abernathy; right end, Venable; quarterback, Winston; left half, Belk; full back, Porter; right half, Ruffin.

The substitutes to be taken to Richmond are Colmes, Parker, Sman, Tillett, Will, Tillett, John, Young, Crutchfield and Hedgepeth.

The above team is the best that Carolina has put out in a number of years. Applewhite, on left end, a first year man, gives promise of being one of the best ends Carolina has ever turned out. He can handle the forward pass to perfection. Garrett on left tackle, is an all-South Atlantic man, and knows the game. Thompson in left guard, has made his place on the team for the past three years and is captain this year. Brown, as a center, plays good ball, having been a substitute on last year's team. McLean, the silent Scotchman in right guard, made his sweater last year, and is considered to be physically the best man on the squad. Abernathy, a first year man, is playing right tackle, an dis considered the best tackle in the squad. Winston, who will play quarter-back, is a ten second man, and played end on last year's team. In the backfield Porter, Ruffin and Belk are all stars. Porter is an all-South Atlantic full-back of last year. Ruffin has been playing half-back for the past three years and is in the pink of condition Belk, who is considered one of the best half-backs in the South, will no doubt show up well.

TO RAISE PURITAN.

Monitor Which Was Disabled by Explosion in Hampton Roads.

Washington, Nov. 23.—The monitor Puritan which was disabled by the experiment several days ago with nitro-geletine will be raised out of the mud of Hampton Roads and towed to the dry dock of the Norfolk navy yard by constructors of the Navy Department and not by private wrecking companies. The department solicited bids from the wrecking companies but the figures they named were excessive in the opinion of the naval experts and it was decided that from a business standpoint it was better policy for the government to undertake the work itself.

Each of the private bidders submitted estimates based upon the question of saving or losing the vessel. The lowest figure set was $22,000 for landing the monitor successfully in drydock or nothing in case she was lost. The work will be undertaken shortly.

CAROLINIANS HONORED.

W. A. Graham and B. W. Kilgore Are Among Officers—Atlantic Meeting.

Atlanta, Ga., Nov. 23.—With the adoption of a resolution changing its name to the Association of Southern Agricultural Workers, the election of officers and the selection of Nashville, Tenn., as the place for the 1911 convention, the 12th annual convention of the Southern States Association of Commissioners of Agriculture came to a close late yesterday.

Dr. Tait Butler, of Starkville, Miss., editor of the Progressive Farmer, was elected president. The other officers elected were: Vice presidents, W. A. Graham, North Carolina; W. R. Dodson, Louisiana; secretary treasurer, B. W. Kilgore, North Carolina; assistant secretary, Dr. R. E. Stallings, Georgia.

Under the laws of the new association agricultural colleges and State departments of agriculture, will be required to pay a fee of $100 annually; experiment stations and farmers' institutes will pay $5 annually, and individuals will be assessed $1.

SHIPPERS HAVE INNING.

In Freight Rate Hearing Before Commerce Commission.

Washington, Nov. 21.—The shippers had their inning today in the contest before the Inter-State Commerce Commission over the suspended proposed increases in freight rates on the Eastern Trunk lines. Their contentions were that the advances were not justified and that the real solution of the problem of meeting a railroad's need for greater net income lay in introduction of scientific principles of management.

TELEPHONES ON THE FARM.

Proven Itself of Greatest Value to Farmer and Family.

(Georgia-Carolina Agriculturist.)

During the year now ending the rural telephone system has been considerably extended in this section, and this modern convenience has proven itself of the greatest value to the farmer and his family. Every one who has tried it and who from experience, has learned its practical value, would be unwilling to give it up and do without it, if there were any way of keeping it. And, of course, nobody need ever give it up, since the line, once having been built, it costs practically nothing to keep it up.

For these reasons it is certain that these rural telephone systems will be extended. Farmers, learning from their neighbors the value of a telephone in the house, will desire the same advantage for themselves, and will hasten to provide themselves with it.

This is a far easier matter than most people may think, and also far less costly. Most farms can supply telephone poles. They do not require to be large poles as are necessary in the city or for the carrying of many wires along the public roads, but any poles of reasonable height and of reasonable strength and durability will answer. These can be planted at proper intervals by ordinary farm laborers at odd times, and so the providing of the poles would be a matter of practically no cost. Wire also is cheap, and it may be strung just as the poles were placed, and here at small cost, is the line. It may be run from one farmhouse to another, and with an instrument placed in each house a way of instant and constant communication between these two houses will have been provided at a very small initial cost, and at no cost whatever to maintain, except to see that the poles are ekpt up.

A better way of course, is for the farmers of a neighborhood to combine, run their wires to some central place and there connect with the Bell Telephone system. This would bring each farmer on the line not only in touch with one neighbor, but with all his neighbors and with everybody else in the country who has a telephone in his house, office or store. This service, of course costs something, but it is offered by the Bell Telephone Company at very low rates, so that this cost is not of a nature to make farmers hesitate to assume it.

The telephone robs life on the farm of the worst part of that feeling of isolation which constitutes really the greatest drawback to life on the farm, and hence as fast as possible all farmers should try to install a telephone in their homes.

STATE PRIMARY TEACHERS.

Strong Speakers for Sixth Annual Meeting in Raleigh.

(Special Star Correspondence.)

Greensboro, N. C., Nov. 24.—The Primary Teachers' Association will hold its sixth annual meeting in Raleigh, December 1st, 2nd and 3rd. As so many strong speaers have been secured it is hoped that the attendance will be the largest that this association has yet had.

Miss Naomi Norsworthy, Ph. D., Columbia University, has been secured to make two, and probably three addresses. Dr. Norsworthy is professor of Psychology in the Teachers' College, Columbia University. Her research work in Psychology and Child Study have made her a recognized authority in this department. She is also a woman of delightful personality and a magnetic teacher.

Miss Laura McAllester, a graduate of the Boston Normal School of Gymnastics, will speak on Play—a Factor in the School room. Miss McAllester was formerly connected with the city schools of Rochester, N. Y., as Physical Director. She is now Physical Director of the State Normal and Idustrial College.

Prominent primary teachers of the State will also give talks.

Drs. Rankin and Tucker, of Raleigh, have consented to give talks on subjects relating to the health of schol children. These gentlemen are too well known throughout the State to need any introduction.

The primary teachers of Raleigh are making every effort to entertain the teachers royally.

Any one who expects to attend is asked to notify Miss Mary Arrington, Person street, Raleigh, N. C., a week in advance. Superintendents recognizing the benefit their teachers received have often given a holiday during the days that they are absent Any superintendent is gladly welcomed at the meetings.

NATIONAL HIGHWAYS.

Important Movement Launched in Washington—Road Improvement.

Washington, Nov. 22.—A Nationwide movement for harmonious development of the highway systems of the country was launched today in the formation of the American Association for Highway Improvement. The organization will co-operate with the numerous county and State associations for road improvement already in existence. A general plan will be drafted for the systematic improvement of roads and efforts will be made to secure uniform State legislation.

Logan Waller Page, director of the United States Bureau of Public Roads in the Department of Agriculture, who was elected president of the new association, declared today that if the ninety million spent annually for better roads, nearly 50 per cent. was wasted. He said that the residents and farmers of the country would heartily support the present movement.

The other officers elected were W. C. Brown, president of New York Central Railroad, vice president; Leo McClung, treasurer of the United States, treasurer, and J. E. Pennybaker, Jr., chief of road management in the Department of Agriculture, secretary. Headquarters have been established here.

Shall Women Vote?

If they did, millions would vote Dr. King's New Life Pills the true remedy for women. For banishing dull, fagged feelings, backache or headache, constipation, dispelling colds, imparting appetite and toning up the system, they're unequalled. Easy, safe, sure. 25c at Robert R. Bellamy's.

B. & O. PRESIDENT SPEAKS.

Says Raise in Rates is Imperitive if Operation Increases.

New York, Nov. 22.—Daniel Willard, President of the Baltimore and Ohio Railroad delivered an adress this evening at the annual dinner of the Railway Business Association. He said in part:—

If costs of railroad operation continue to go up there would seem to be only one way of meeting the situation, and that is by an increase of rates. Any such increase must be approved by the Interstate Commerce Commission. This operates, as I view it, to place the credit of the railroads in the hands of the Commission; for credit will depend upon net earnings, and net earnings will be dependent upon the rates received which in turn rests with the Commission.

I have confidence in the intelligence and integrity of the Commission. It is the duty of the roads to see that the Commission is fully informed concerning the roads' necessities. It is of great importance also that the atmosphere of public discussion should be so free from heat that the Commission may be assisted and not impeded by public opinion in reaching just and wise conclusions. To this end, I believe, most of the railroads by their present policy in dealing with the public are earnestly endeavoring to avoid needless antagonism.

The roads should recognize in the future more than they have in the past that while they are under certain precise as well as implied obligations to their security holders, they are also charged with a public service to perform, and there are also certain clear and implied obligations in that direction, among which is this:

To treat alike giving as full consideration as possible to all reasonable requirements. In short, while giving full and proper consideration to the rights of the security holders, to give fair consideration also to the rights and feelings of the shipper.

I think the road should keep out of politics. This makes it necessary to take the public into their confidence as far as possible, so that the public, being fully and correctly informed, may act intelligently and fairly toward the railroads.

There is to-day in the minds of railroad managers a feeling of uncertainty, of hesitancy, as regards the future.

Let the people who use the roads and want the roads now indicate that having secured the passage of such laws as they considered necessary in order to create the conditions complained of, they are now willing to forget the past and open a new account with the future. Let them consider each new proposal for freedom from any spirit of retaliation. Let them hold their official representatives strictly accountable for adopting no new restriction which is not urgently needed.

There has been too much legislation. If a more conservative attitude should result in giving the railroads a respite from further regulation, for a time at least, and until they can work out some of the many problems confronting them, the patient now indisposed will immediately show signs of convalescence.

STOLE MARCH ON PARENTS.

Woman Weds While Mother Goes to Station for Father.

(Baltimore Sun, 22nd.)

The parents and sisters of Miss Annie Moore, of Cheraw, S. C., who have been stopping at the New Howard Hotel, were greatly surprised yesterday when the young lady announced to them that she had just been married, and as evidence produced a marriage license and S. C. Whitaker, a medical student at the University of Maryland, the husband. His home is Enfield, N. C.

It all came about this way, Mrs. C. F. Moore, with Misses Annie, Ethel and Mamie Moore, her daughters, arrived at the hotel last Saturday morning. Miss Annie had known Mr. Whitaker and when he found that she was in the city they met several times. Yesterday morning Mr. Moore was expected to arrive at Union station and Misses Ethel and Mamie arranged with the mother to go to meet their father. It was agreed to, but Miss Annie said she preferred to remain at the hotel.

After her sisters and mother had gotten out of sight, a taxicab was caued and Mr. Whitaker and Miss Moore hurriedly went to the parsonage of Aisquith Street Presbyterian Church, 1631 North Carolina street, where Rev. David T. Neely, the pastor, performed the ceremony.

They returned to the hotel and after several minutes father, a genial Southerner with a happy smile, and mother and sisters arrived all locked arm in arm.

The marriage was announced. There was some surprise, but the parental blessing was bestowed. Mr. Moore, his wife and the other two daughters left later for New York, Mr. and Mrs. Whitaker will remain in the city until June, when they will return to Enfield. Mr. Whitaker graduates this year.

EXPERIENCE IN MEXICO.

Traveling Man Relates Thrilling Experience in Revolutionary District.

El Paso, Texas, Nov. 22.—A. G. Springer, a New York traveling man, arrived here today direct from the scenes of the disorder around Torreon. He said:

"The whole country through which I passed is in arms, and in many places a state of terror prevails. I was in Monterey Sunday. The troops were in full control and everything was quiet. At the station I saw thirty men, each carrying a rifle, get off a train. The police and rurales immediately surrounded them, but I do not know the outcome, as the train pulled out.

"I reached Torreon on Monday and found the Gomez Palacio in the nands of the revolutionists. Everything was closed at Torreon; banks, stores and saloons and business was at a standstill. A mining engineer and myself visit Gomez Palacio on a tram car and we saw bodies lying about the streets and were told that a battle had taken place between the revolutionists and the rurales.

Fine for open grates, abse burners and furnaces. Try Gas Coke.

RHODE ISLAND BONDS.

Statement Made by Governor Pothier in a Campaign Rally.

(Woonsocket, R. I., Evening Call, 7th)

The opposition of the administration certainly have made a desperate scramble for material in the campaign. At the eleventh hour they have dragged forth another bugaboo in which the public is so vitally interested that no one has thought to speak of it before. As usual, however, this matter is now presented in such a garbled state and so confused in a haze of misrepresentation that it again becomes necessary to clear the atmosphere. I refer to the North Carolina bond gift to the State, which under the law I was in duty bound to accept and turn over to the general treasurer. I was also duty bound to report its acceptance to the General Assembly, which I did in the first days of the last session. The General Assembly decided very promptly that the State did not want these bonds under the circumstances of their devise, and directed me to return them to the donors, which I as promptly did. The General Assembly also promptly changed the law so that in the future no Governor will be compelled to accept such gifts without the exercise of discretion, which I as promptly approved. If there is anything in this course to which our friends can take exception I fail to see it. Perhaps, however, the bill amending this law is one of those to which our opponents vaguely refer when they deprecate that the veto power has not been more freely exercised.

TO SUCCEED DOLLIVER.

Senator Lafayette Young Announces His Candidacy.

Des Moines, Ia., Nov. 22.—United States Senator LaFayette Young, appointed by Governor Carroll to serve until the coming General Assembly, today formally announced his candidacy to fill the unexpired term of the late Senator Dolliver, which terminates March 4, 1913. The Senator makes it plain that he is under no pledge to Governor Carroll not to be a candidate now or for the term beginning March 4, 1913.

SOUTHBOUND JUBILEE.

Winston-Salem Preparing for Big Celebration Dec. 15th.

Winston-Salem, N. C., Nov. 23.—There was a joint meeting last night of all the committees appointed in connection with the Southbound jubilee and plans for the entertainment of the visitors was further discussed. Something like 2,000 visitors are expected here on December 15th, the day on which the first schedule train will be conducted. All of the clubs and manufacturing concerns, as well as publis buildings and grounds will be thrown open to the visitors.

SCROFULA

HEREDITARY BLOOD POISON

Scrofula is a disease manifested usually by a swelling and ulceration of the glands, especially about the neck. It is almost entirely hereditary in its origin, being the dregs or remains of some specific blood poison. Where the blood is greatly weakened with the scrofulous poison, the disease attacks other portions of the system besides the glands, and then we see its effects in weak eyes, poorly developed bodies, running sores and ulcers, skin diseases, especially on the scalp, catarrhal troubles, etc. Scrofula usually makes its appearance in childhood, though manhood or womanhood may be reached before the poison progresses to the stage of outward manifestation. S. S. S. is the one real cure for Scrofula. It is a blood purifier without an equal, and it cures this destructive blood poison by removing every trace of the infection from the circulation. S. S. S., in addition to cleansing and purifying the blood, assists the stomach and digestive members in the creation of new blood corpuscles and other nourishing matter for the circulation. S. S. S. increases the resistive powers of the system and by strengthening and building up the vitality, allows nature to make a perfect and lasting cure. Book describing the disease and any medical advice sent free to all who write.

THE SWIFT SPECIFIC CO., Atlanta, Ga.

ADVERTISEMENT.

Sealed proposals for paving Front Street from Dawson Street to Wright Street, Wright Street from Third Street to Sixth Street, and Sixth Street from Wright street to Dawson street, for the City of Wilmington, N. C., will be received by the Board of Aldermen at the Mayor's office up to noon, December 22nd, 1910, and at that time they will be opened and publicly read, addressed to Capt. Walter G. MacRae, Mayor, and endorsed "Proposals for Paving Streets."

The work for which proposals are invited consists approximately of 4,263 square yards of macadam pavement.

Each proposal must be accompanied with a certified check of five per cent. (5) of the contract price and made payable to the Board of Aldermen of Wilmington, N. C.

Specifications and blank forms of proposals can be obtained by application to the City Engineer, and profile may be seen at his office.

The right is reserved to reject any and all bids.

WALTER G. MacRAE,
Mayor.

Twenty-Five Cents

For each twenty-five words or less for each time you wish the ad to run, and one cent for each word in addition to twenty-five. We find the finders of values and the losers too. We find servants for homes, clerks and managers for offices and offices for clerks and managers; tenants for rooms and houses and rooms and houses for tenants; a purchaser for that piece of real estate and real estate for that purchaser.
